

Boletín de Adquisiciones Agosto 2023 Parte 1

Anomaly: A Scientific Exploration of the UFO Phenomenon Daniel Coumbe

Contents

1 We Need to Talk about UFOs

Part I: Case Studies 2 Japan Airlines Flight 1628 3 The Brazilian Fragments 4 The Lonnie Zamora Incident 5 The Aguadilla Object

Part II: The Bigger Picture 6 Where Are All the UFOs? 7 When Are All the UFOs? 8 What Does It All Mean?

Eli Tziperman Global Warming Science: A Quantitative Introduction to Climate Change and Its Consequences

GLOBAL WARMING SCIENCE A Quantitative Introduction to Climate Change and Its Consequences

CONTENTS

- **1 OVERVIEW**
- 2 GREENHOUSE
- **3 TEMPERATURE**
- 4 SEA LEVEL
- **5 OCEAN ACIDIFICATION**
- **6 OCEAN CIRCULATION**
- 7 CLOUDS
- 8 HURRICANES
- 9 ARCTIC SEA ICE
- **10 GREENLAND AND ANTARCTICA**
- **11 MOUNTAIN GLACIERS**
- **12 DROUGHTS AND PRECIPITATION**
- 13 HEAT WAVES
- **14 FOREST FIRES**

ELI TZIPERMAN

Michio Sorai Comprehensive Handbook of Calorimetry and Thermal Analysis

Comprehensive Handbook of

Calorimetry & Thermal Analysis

Contents

- Part I PRINCIPLES OF CALORIMETRY AND THERMAL ANALYSIS. 1.1 Calorimetry. 1.2 Thermal Analysis.
- Part II EXPERIMENTAL METHODS.
- 2.1 Temperature Measurement in Thermal Study.
- 2.2 Principles and Methods of Calorimetry.
- 2.3 Principles and Methods of Thermal Analysis.
- 2.4 Other Experiments.
- Part III DATA ANALYSIS.
- **3.1 Data Analysis of Calorimetry.**
- **3.2 Techniques of Thermal Analysis and the Data Analysis.** Part IV HOW TO UTILIZE THE THERMODYNAMIC DATABASE.
- 4.1 Thermodynamic and Related Database.
- 4.2 Utilization of Thermodynamic Database.
- 4.3 Thermodynamic Database for Biomolecules.

Part V ACTUAL APPLICATIONS.

- 5.1 Metals and Alloys.
- 5.2 Inorganic Materials and Ceramics.
- 5.3 Organic Materials and Polymers.
- 5.4 Biomolecules.
- 5.5 Medicines.
- 5.6 Foods and Biomaterials.

Quantum Science: the frontier of physics and chemistry Taku Onishi editor

So Simple a Beginning: How Four Physical Principles Shape Our Living World Raghuveer Parthasarathy

Contents

Part I: The Ingredients of life

- 1 DNA: A Code and a Cord
- 2 Proteins: Molecular Origami
- **3** Genes and the Mechanics of DNA
- 4 The Chreography of Genes
- 5 Membranes: A Liquid Skin
- 6 Predictable Randomness
- Part II: Living Large
- 7 Assembling Embryos
- 8 Organs by Desing
- 9 The Ecosystem inside You
- 10 A Sense of Scale
- 11 Life at the Surface
- 12 Mysteries of Size and Shape
- Part III: Organisms by Design
- 13 How We Read DNA
- **14 Genetic Combinations**
- 15 How We Write DNA
- 16 Designing the Future

Problems and Solutions on Quantum Mechanics 2nd Edition Edited By: Swee Cheng Lim, Choy Heng Lai; and Leong Chuan Kwek

Contents

Part I Basic Principles and One-Dimensional Motions Part II Central Potentials Part III Spin and Angular Momentum Part IV Motion in Electromagnetic Fields Part V Perturbation Theory Part VI Scattering Theory & Quantum Transitions Part VII Many-Particle Systems Part VIII Miscellaneous Topics Index to Problems

Attilo Maccari

Asymptotic perturbation methods: for nonlinear differential equations in physics

Contents

- **1 THE ASYMPTOTIC PERTURBATION METHOD FOR NONLINEAR OSCILLATORS**
- 2 THE ASYMPTOTIC PERTURBATION METHOD FOR REMARKABLE NONLINEAR OSCILLATORS
- **3 THE ASYMPTOTIC PERTURBATION METHOD FOR VIBRATION CONTROL WITH TIME DELAY STATE FEEDBACK**
- 4 THE ASYMPTOTIC PERTURBATION METHOD FOR VIBRATION CONTROL WITH NONLOCAL DYNAMICS
- 5 THE ASYMPTOTIC PERTURBATION METHOD FOR NONLINEAR CONTINUOUS SYSTEMS
- 6 THE ASYMPTOTIC PERTURBATION METHOD FOR DISPERSIVE NONLINEAR PARTIAL DIFFERENTIAL EQUATIONS
- 7 THE ASYMPTOTIC PERTURBATION METHOD FOR PHYSICS PROBLEMS
- 8 THE ASYMPTOTIC PERTURBATION METHOD FOR ELEMENTARY PARTICLE PHYSICS
- 9 THE ASYMPTOTIC PERTURBATION METHOD FOR ROGUE WAVES IN NONLINEAR SYSTEMS
- 10 THE ASYMPTOTIC PERTURBATION METHOD FOR FRACTAL AND CHAOTIC SOLUTIONS IN NONLINEAR PARTIAL DIFFERENTIAL EQUATIONS
- 11 THE ASYMPTOTIC PERTURBATION METHOD FOR NONLINEAR QUANTUM MECHANICS
- 12 COSMOLOGY
- **13 CONFINEMENT AND ASYMPTOTIC FREEDOM IN A PURELY GEOMETRIC FRAMEWORK**
- 14 THE ASYMPTOTIC PERTURBATION METHOD FOR A REVERSE INFINITE-PERIOD BIFURCATION IN THE NONLINEAR SCHRÖDINGER EQUATION

Gabriele Nunzio Tornetta Mathematical Quantum Physics: a foundational introduction

Contents

The Basic Postulates
Relativistic Invariance
Quantum Mechanics
Quantum Field Theory
Further Topics

Jens-Volker Kratz Nuclear and Radiochemistry: Fundamentals and applications 4^a ed. 2 vols.

WILEY-VCH

Contents

- Volume 1
- **1 Fundamental Concepts**
- 2 Radioactivity in Nature
- 3 Radioelements and Radioisotopes and Their Atomic Masses
- **4 Other Physical Properties of Nuclei**
- **5 The Nuclear Force and Nuclear Structure**
- 6 Decay Modes
- **7 Radioactive Decay Kinetics**
- **8 Nuclear Radiation**
- 9 Measurement of Nuclear Radiation
- **10 Statistical Considerations in Radioactivity Measurements**
- **11 Techniques in Nuclear Chemistry**
- V
- olume 2
- **12 Nuclear Reactions**
- **13 Chemical Effects of Nuclear Transmutations**
- 15 Nuclear Energy, Nuclear Reactors, Nuclear Fuel, and Fuel Cycles
- **16 Sources of Nuclear Bombarding Particles**
- **17 Radioelements**
- 18 Radionuclides in Geo- and Cosmochemistry
- **19 Dating by Nuclear Methods**
- **20 Radioanalysis**
- **21 Radionuclides in the Life Sciences**
- 22 Radionuclides in the Geosphere and the Biosphere
- **23 Dosimetry and Radiation Protection**

Nuclear and Radiochemistry

Fundamentals and Applications Fourth Edition 2 Volumes

Introduction to Quantum Field Theory: Classical Mechanics to Gauge Field Theories Anthony G. Williams

Contents

- 1 Lorentz and Poincaré Invariance
- 2 Classical Mechanics
- 3 Relativistic Classical Fields
- 4 Relativistic Quantum Mechanics
- **5** Introduction to Particle Physics
- 6 Formulation of Quantum Field Theory
- 7 Interacting Quantum Field Theories
- 8 Symmetries and Renormalization
- 9 Nonabelian Gauge Theories

Signal Processing for Radiation Detectors Mohammad Nakhostin

Contents

- **1** Signal Generation in Radiation Detectors
- 2 Signals, Systems, Noise, and Interferences
- **3** Preamplifiers
- 4 Energy Measurement
- 5 Pulse Counting and Current Measurements
- 6 Timing Measurements
- 7 Position Sensing
- 8 Pulse-Shape Discrimination
- 9 Introduction to Digital Signals and Systems
- **10 Digital Radiation Measurement Systems**

Weston M. Stacey Nuclear Reactor Physics 3rd,Revised Edition

WILEY-VCH

Nuclear Reactor Physics

Third, Revised Edition

Heterogeneous Catalysis for Sustainable Energy Edited by Landong Li and Justin S. J. Hargreaves

WILEY-VCH

Edited by Landong Li and Justin S. J. Hargreaves

Heterogeneous Catalysis for Sustainable Energy

Contents

- Part 1 Basic Reactor Physics
- 1 Neutron–Nuclear Reactions
- 2 Neutron Chain Fission Reactors
- **3 Neutron Diffusion and Transport Theory**
- **4 Neutron Energy Distribution**
- 5 Nuclear Reactor Dynamics
- 6 Fuel Burnup
- **7 Nuclear Power Reactors**
- 8 Reactor Safety

Part 2 Advanced Reactor Physics

- 9 Neutron Transport Theory 307
- **10 Neutron Slowing Down 395**
- **11** Resonance Absorption
- **12 Neutron Thermalization**
- **13 Perturbation and Variational Methods**
- 14 Homogenization
- **15 Nodal and Synthesis Methods**
- **16 Space–Time Neutron Kinetics**

Contents

PART I Hydrogen Economy

- 1 Catalytic Hydrogen Production
- 2 Catalytic Reforming of Oxygen-Cotaining Chemicals
- 3 Advances in Fischer-Tropsch Synthesis for the Production of Fuels and Chemicals
- Part II: Methane Activation
- 4 Steam and Dry Reforming of Methane
- 5 Methane Activation Over Zeolites
- 6 Selective Oxidation of Methane to Oxygenates Using Part III: Alkane Activation
- 7 Catalytic Cracking of Hydrocarbons to Light Olefins
- 8 Catalytic Dehydrogenation of Light Alkanes
- Part IV Zeolite Catalysts
- 9 Zeolites for Sustainable Chemical Transformations
- 10 Methanol to Hydrocarbons
- Part V Carbon Dioxide As C1 Building Block
- 11 Overview on CO₂ Emission and Capture
- **12 CO₂ reduction to Fuels and Chemicals**
- Part VI Biomass Conversion
- **13 Lipids to Fuels and Chemicals**
- 14 Lignin Upgrading

Introduction to the Standard Model and Beyond Quantum Field Theory, Symmetries and Phenomenology Stuart Raby

Contents

Part I Getting Started

1 Notation

Part II Symmetries and Quantum Field Theory

- 2 Poincaré Invariance
- 3 Spin
- 4 Completeness and Normalization
- 5 Quantum Mechanics
- 6 Unitarity and Partial Waves
- 7 Introduction to Field Theory
- 8 Complex Scalar Field
- 9 Spin-1/2 Particles
- 10 Weyl Spinors
- 11 Spin-1 Particles
- 12 The S Matrix in Field Theory

Part III Quantum Electrodynamics

- **13 Quantum Electrodynamics**
- 14 Magnetic Moments in QED
- 15 The Size of the Proton
- Part IV Discrete Symmetries and their Consequences
- 16 Charge Conjugation and Parity
- 17 Time-Reversal Invariance
- 18 CPT Theorem

Part V Flavor Symmetries

- **19 Global Symmetries**
- 20 Testing Isospin and G Parity
- 21 Evidence for New Particles, Quantum Numbers and Interactions
- 22 Representation Theory for SU(2)
- 23 SU(3) Symmetry
- 24 Tests of SU(3) Symmetry
- Part VI Spontaneous Symmetry Breaking
- 25 Spontaneous Symmetry Breaking
- 26 Spontaneous Symmetry Breaking in Hadronic Physics
- 27 Current Algebra and the Adler–Weisberger Relation
- Part VII Road to the Standard Model: Quantum Chromodynamics
- 28 Quantum Chromodynamics
- 29 Quantizing Non-Abelian Gauge Theory
- **30 Renormalization**
- 31 Deep Inelastic Electron–Nucleon Scattering
- **32 LHC Physics and Parton Distribution Functions**

Part VIII - Road to the Standard Model: Electroweak Theory

- **33 The Electroweak Theory**
- 34 Electroweak Symmetry Breaking
- 35 Electroweak Phenomena
- 36 Deep Inelastic Scattering Revisited
- **37 Weak Interactions of Quarks**
- Part IX The Standard Model
- 38 Three-Family Model
- **39 Determining VCKM and Quark Masses**
- 40 CP-Violating Parameters eK and e'K
- 41 Effective Field Theories
- 42 Anomalies
- Part X Neutrino Oscillations
- 43 Neutrino Oscillations: Atmospheric
- 44 Neutrino Oscillations: Solar
- 45 Neutrino Oscillations Cont'd: Neutrino Mass and Mixing Angles
- Part XI Grand Unification
- 46 Grand Unification
- **47** Supersymmetry
- **48 Superfields**
- 49 SUSY SU(5)
- Part XII Minimal Supersymmetric Standard Model
- 50 Supersymmetric Standard Model
- 51 Spontaneous SUSY Breaking
- 52 MSSM Phenomenology
- Part XIII Second-Semester Projects
- 53 Suggested Term Projects 1
- 54- Suggested Term Projects 2

Basic Space Plasma Physics Third Edition Wolfgang Baumjohann and Rudolf A

Contents

- **1** Introduction
- 2 Single Particle Motion
- **3 Trapped Particles**
- **4** Collisions and Conductivity
- 5 Convection and Substorms
- **6** Elements of Kinetic Theory
- 7 Plasma Magnetohydrodynamics
- 8 Flows and Discontinuities
- 9 Waves in Plasma Fluids
- 10 Wave Kinetic Theory
- 11 Plasma Instability
- **12 Collisionless Reconnection**
- 13 Collisionless Shocks
- **14 Final Remarks**

Magnetospheres in the Solar System

Editors: Romain Maggiolo, Nicolas André, Hiroshi Hasegawa, Daniel T. Welling

Contents

Part I: The Earth Magnetosphere

1 A Brief History of the Magnetosphere

2 Large-Scale Structure and Dynamics of the Magnetosphere

3 The Equations of the Magnetosphere

Part II: Fundamental Processes

4 Magnetic Reconnection in the Near-Earth Magnetotail

5 Turbulence and Complexity of Magnetospheric Plasmas

6 Wave--Particle Interactions in the Earths Magnetosphere

7 Cross-Scale Energy Transport in Space Plasmas: Applications to the Magnetopause Boundary

Part III: Solar Wind--Magnetosphere Coupling

8 Solar Wind Interaction with Earths Bow Shock

9 The Magnetosheath

10 Dayside Magnetopause Processes

11 The Polar Cusps of the Earths Magnetosphere

12 The Earths Low-Latitude Boundary Layer

Part IV: Magnetosphere--Ionosphere Coupling

13 Field-Aligned Currents in the Magnetosphere--Ionosphere

14 Ionospheric Ion Acceleration and Transport

15 Cold Ionospheric Ions in the Magnetosphere

16 Magnetosphere--lonosphere Coupling of Precipitating Electrons and Ionospheric Conductance

Part V: The Dynamic Magnetosphere 17 Magnetotail Processes 18 The Active Magnetosphere: Substorms and Storms 19 The Northward IMF Magnetosphere

20 A Brief Review of the Ring Current and Outstanding Problems

21 Source, Loss, and Transport of Energetic Particles Deep Inside Earths Magnetosphere (L <4)

22 The Plasmasphere: Its Interactions and Dynamics

23 Impact of Ionospheric Ions on Magnetospheric Dynamics

Part VI: Planetary Magnetic Fields 24 Planetary Magnetic Fields

Part VII: Induced Magnetospheres

25 Induced Magnetospheres: Mars

27 Birth of a Magnetosphere

28 Induced Magnetospheres: Atmospheric Escape

Part VIII: Giant Planet Magnetospheres

30 Fast Rotating Magnetospheres: Jupiter and Saturn Plasma Sources, Loss and Transport

31 Gas Giant Magnetosphere--Ionosphere--Thermosphere Coupling 4

32 The Radiation Belts of Jupiter and Saturn

33 Asymmetrical Magnetospheres: Uranus and Neptune

Part IX: Mini-magnetospheres and Moon--Magnetosphere Interactions

34 A Dungey Cycle in the Life of Mercurys Magnetosphere

35 The Magnetosphere of Ganymede

36 Overview of Moon--Magnetosphere Interactions

Part X: Investigating Magnetospheric Processes

37 Global Simulations

38 Kinetic Modeling in the Magnetosphere

39 Data-Based Modeling of the Earth's Magnetic Field

40 Multispacecraft Measurements In The Magnetosphere

41 Exploring Small Scales with MMS

42 Global Energetic Neutral Atom (ENA) Imaging of Magnetospheres

43 Laboratory Experiments: Putting Space into the Lab

Part XI: Future Directions

44 Challenges in Modeling the Outer Magnetosphere

45 Does a Magnetosphere Protect the Ionosphere?

46 Some Unsolved Problems of Magnetospheric Physics

47 Instigators of Future Change in Magnetospheric Research
