

Boletín de Adquisiciones

Diciembre 2022

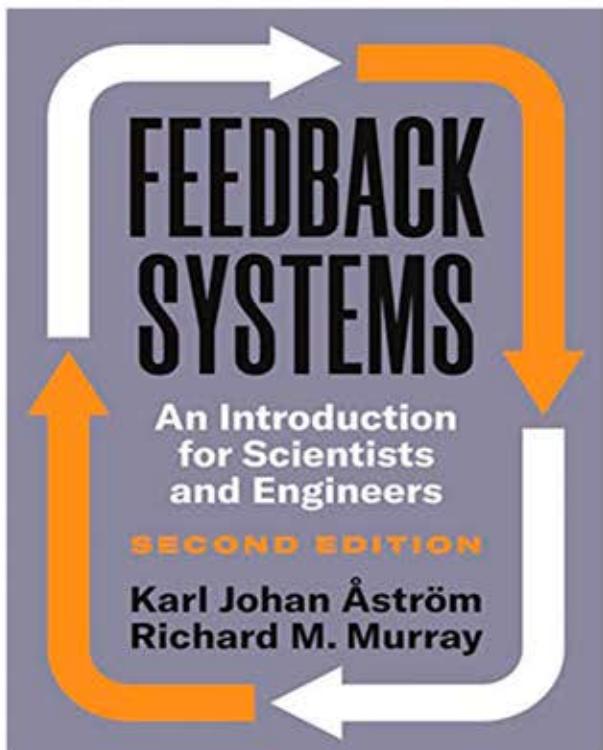

A Guide to Close Binary Systems
Edwin Budding, and Osman Demircan

Contents

1. Introduction.
2. Statics.
3. Dynamics.
4. The Roche Model.
5. Visual and Astrometric Systems.
6. Spectroscopic Binaries.
7. Photometric Data Analysis.
8. Evolution Overview.
9. Binaries in Early Stages.
10. Moderately Evolved Systems.
11. Advanced Evolution.

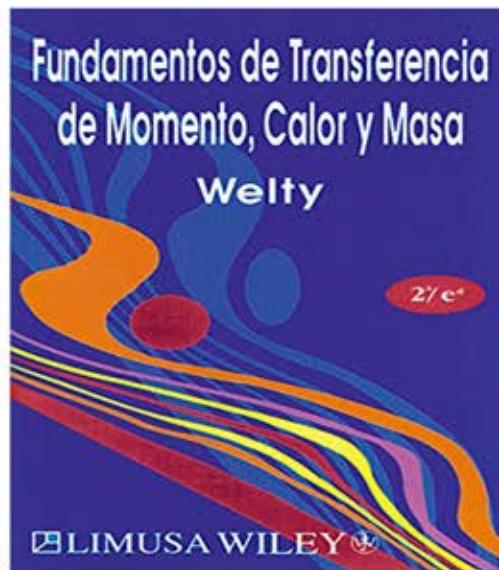

Feedback Systems: An Introduction for Scientists and Engineers
Karl Johan Åström and Richard M. Murray
Second Edition

Contents

- Preface to the Second Edition
Preface to the First Edition

- 1 Introduction
- 2 Feedback Principles
- 3 System Modeling
- 4 Examples
- 5 Dynamic Behavior
- 6 Linear Systems
- 7 State Feedback
- 8 Output Feedback
- 9 Transfer Functions
- 10 Frequency Domain Analysis
- 11 PID Control
- 12 Frequency Domain Design
- 13 Robust Performance
- 14 Fundamental Limits

Contenido

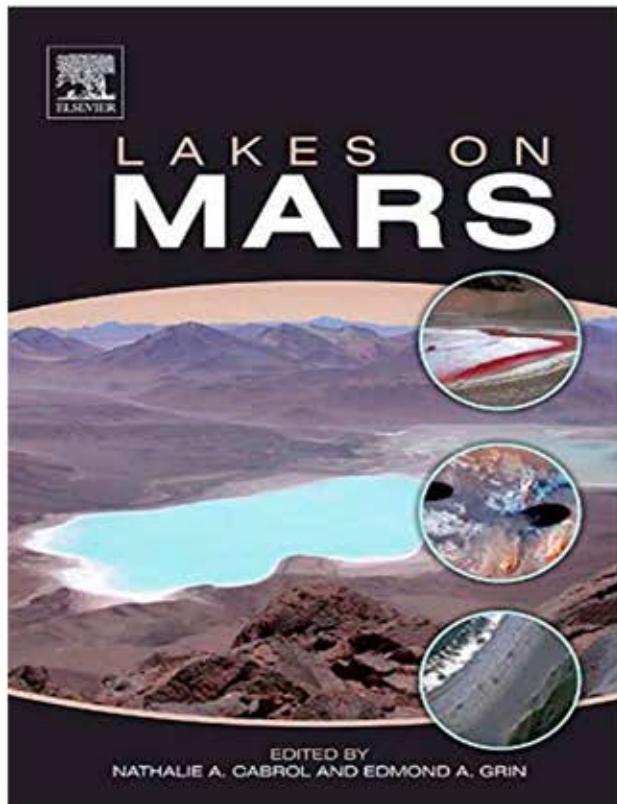

- Capítulo 1 Conceptos y definiciones**
- Capítulo 2 Estática de fluidos**
- Capítulo 3 Descripción de un fluido en movimiento**
- Capítulo 4 Conservación de la masa: criterio del volumen de control**
- Capítulo 5 Segunda ley de Newton del movimiento: criterio del volumen de control**
- Capítulo 6 Conservación de la energía: criterio del volumen de control**
- Capítulo 7 Esfuerzo cortante en flujo laminar**
- Capítulo 8 Análisis de un elemento diferencial del fluido en flujo laminar**
- Capítulo 9 Ecuaciones diferenciales de flujo de fluidos**
- Capítulo 10 Flujo de fluidos no viscosos**
- Capítulo 11 Análisis dimensional**
- Capítulo 12 Flujo viscoso**
- Capítulo 13 Efecto de la turbulencia sobre la transferencia de momento**
- Capítulo 14 Flujo en conductos cerrados**
- Capítulo 15 Fundamentos de transferencia de calor**
- Capítulo 16 Ecuaciones diferenciales de transferencia de calor**
- Capítulo 17 Conducción en estado estacionario**
- Capítulo 18 Conducción en estado transitorio**
- Capítulo 19 Transferencia de calor por convección**
- Capítulo 20 Correlaciones en la transferencia de calor por convección**
- Capítulo 21 Ebullición y condensación**
- Capítulo 22 Equipo para transferencia de calor**
- Capítulo 23 Transferencia de Calor por radiación**
- Capítulo 24 Fundamentos de la transferencia de masa**
- Capítulo 25 Ecuaciones diferenciales de la transferencia de masa**
- Capítulo 26 Difusión molecular en estado estacionario**
- Capítulo 27 Difusión molecular en el estado transitorio**
- Capítulo 28 Transferencia de masa por convección**
- Capítulo 29 Transferencia de masa en la interfase**
- Capítulo 30 Correlaciones en la transferencia de masa por convección**
- Capítulo 31 Equipo para transferencia de masa**

Nomenclatura

Apéndices

Lakes on Mars

Edited by Nathalie A. Cabrol and Edmond A. Grin

Contents

Something special about Mars

List of acronyms

List of contributors

- 1 Searching for lakes on Mars: Four decades of exploration
- 2 Acquisition and history of water on Mars
- 3 Hydrologic provinces of Mars: Physiographic controls on drainage and ponding
- 4 Heated lakes on Mars
- 5 Lakes in Valles Marineris
- 6 Episodic ponding and outburst flooding associated with chaotic terrains in Valles Marineris
- 7 Evidence for ancient lakes in the Hellas region
- 8 Deltas and valley networks on Mars: Implications for a global hydrosphere
- 9 The northern plains: A Martian oceanic basin?
- 10 The Western Elysium Planitia Paleolake
- 11 The sedimentary record of modern and ancient dry lakes
- 12 Aqueous depositional settings in Holden crater, Mars
- 13 Dynamics of declining lake habitat in changing climate

Técnicas experimentales en física nuclear y de las radiaciones

Antonio Ferrer Soria

Contenido

Capítulo 1 Interacción de las partículas con la materia

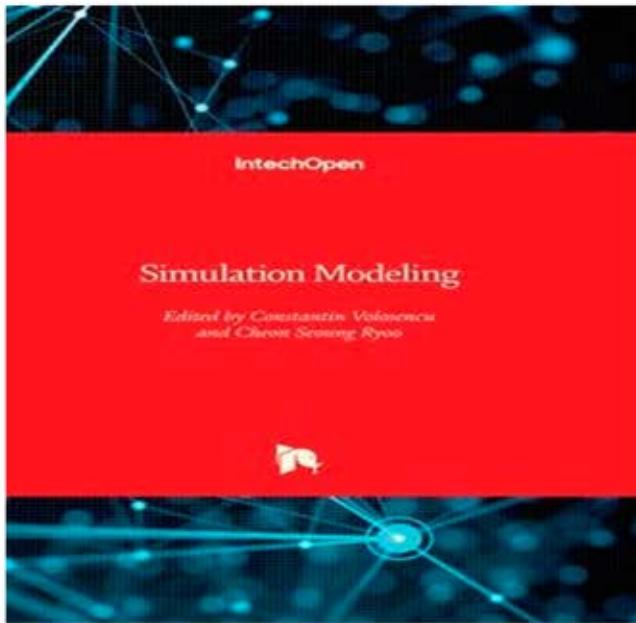

Capítulo 2 Detectores de partículas

Capítulo 3 Métodos estadísticos en física nuclear y de partículas

Capítulo 4 Radiactividad y desintegración nuclear

Capítulo 5 Dosimetría. Unidades. Efectos biológicos de la radiación

Capítulo 6 Aceleradores de partículas

Contents

Section 1 Mathematics

Chapter 1 Numerical Verification Method of Solutions for Elliptic Variational Inequalities

Chapter 2 An Algebraic Hyperbolic Spline Quasi-Interpolation Scheme for Solving Burgers-Fisher Equations

Chapter 3 A Study of Nonlinear Boundary Value Problem

Section 2 Biomedicine

Chapter 4 Agent-Based Modeling and Analysis of Cancer Evolution

Chapter 5 AI Modeling to Combat COVID-19 Using CT Scan Imaging Algorithms and Simulations: A Study

Section 3 Systems of Systems

Chapter 6 Systems-of-Systems MS&A for Complex Systems, Gaming and Decision for Space Systems

Section 4 Materials Science and Engineering

Chapter 7 Thermomechanical Analysis of Ceramic Composites Using Object Oriented Finite Element Analysis

Chapter 8 Investigation of Strain Effect on Cleavage Fracture for Reactor Pressure Vessel Material

Chapter 9 Simulation Model of Fragmentation Risk

Section 5 Electric Power Systems

Chapter 10 Simulation Modeling of Integrated Multi-Carrier Energy Systems

Section 6 Economy

Chapter 11 Using Simulation Modeling for Finding the Limits of Economic Development Lending without a Financial Crisis

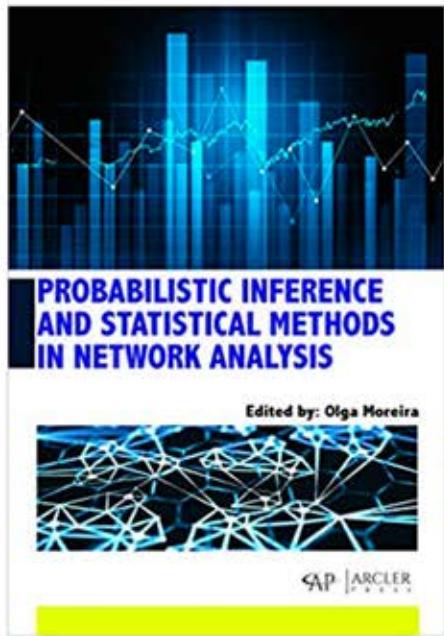

Table of contents

SECTION I SOCIAL NETWORKS

- Chapter 1 Using Social Network Analysis of Human Aspects for Online Social Network Software: A Design Methodology
- Chapter 2 A Social Network Analysis on Clinical Education of Diabetic Foot
- Chapter 3 Rational Erdős Number and Maximum Flow as Measurement Models for Scientific Social Network Analysis
- Chapter 4 Identifying Network Public Opinion Leaders Base don Markov Logic Networks
- Chapter 5 Constructing, Conducting and Interpreting Animal Social Network Analysis

SECTION II NEURAL NETWORKS

- Chapter 6 Connectivity Inference from Neural Recording Data: Challenges, Mathematical Bases and Research Directions
- Chapter 7 Generative Models for Network Neuroscience: Prospects and Promise

SECTION III GENE REGULATORY NETWORKS AND BIOLOGICAL SYSTEMS

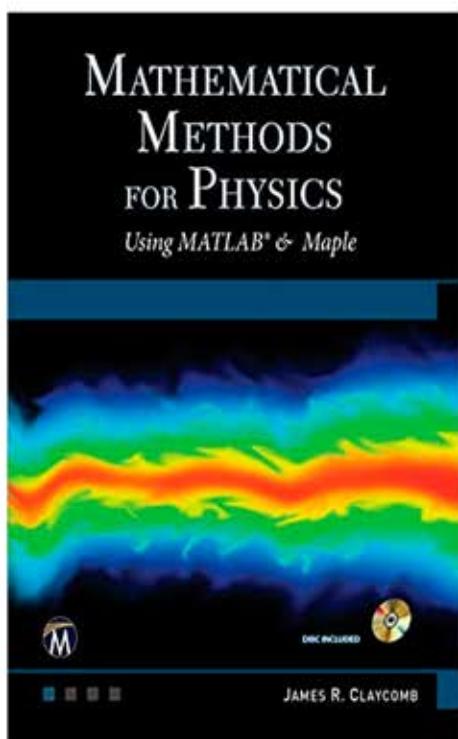

- Chapter 8 Inferring Regulatory Networks from Expressison Data Using Tree-Based Methods
- Chapter 9 Hybrid-Controlled Neurofuzzy Networks Analysis Resulting in Genetic Regulatory Networks Reconstruction

SECTION IV BAYESIAN NETWORKS

- Chapter 10 Bayesian Networks Analysis of Malocclusion Data
- Chapter 11 A Bayesian Network Approach to Causation Analysis of Road Accidents Using Netica
- Chapter 12 InformationTheoretical Methods for Complex Netwok Structure Reconstruction
- Chapter 13 Revealing Networks from Dynamics: An Introduction

Mathematical Methods for Physics using Matlab and Maple

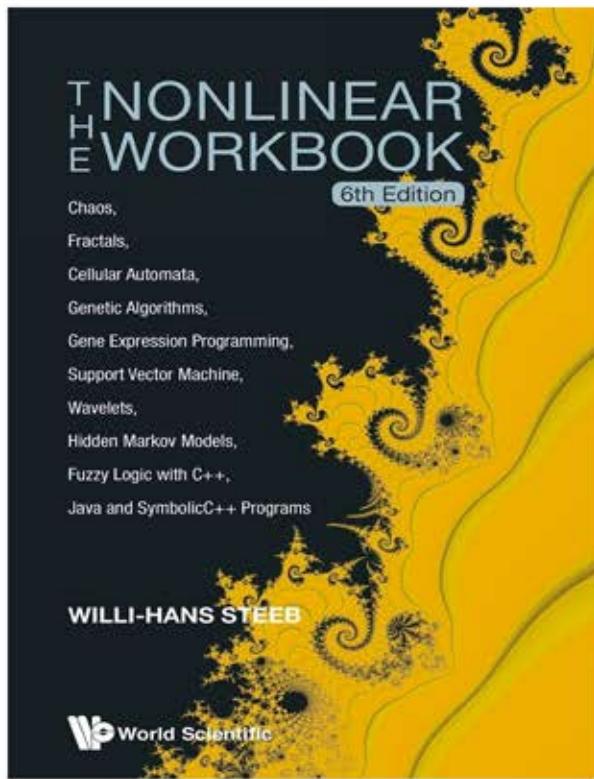

James Claycomb, PhD

Contents

- Chapter 1 Fundamentals
- Chapter 2 Vectors and Matrices
- Chapter 3 Calculus
- Chapter 4 Vector Calculus
- Chapter 5 Ordinary Differential Equations
- Chapter 6 Special Functions
- Chapter 7 Fourier Series and Transformations
- Chapter 8 Partial Differential Equations
- Chapter 9 Complex Analysis
- Chapter 10 Classical Mechanics
- Chapter 11 Electromagnetism
- Chapter 12 Quantum Mechanics
- Chapter 13 Statistical Mechanics
- Chapter 14 Special Relativity
- Chapter 15 General Relativity
- Chapter 16 Relativistic Quantum Mechanics

The Nonlinear Workbook : Chaos, Fractals, Cellular Automata, Genetic Algorithms, Gene Expression Programming, Support Vector Machine, Wavelets, Hidden Markov Models, Fuzzy Logic with C++, Java and SymbolicC++ Programs
Willi-Hans Steeb, Yorick Hardy and Ruedi Stoop

Contents

Comments to the Programs

- 1 Nonlinear and Chaotic Maps
- 2 Time Series Analysis
- 3 Autonomous Systems in the Plane
- 4 Nonlinear Hamilton Systems
- 5 Nonlinear Dissipative Systems
- 6 Nonlinear Driven Systems
- 7 Controlling of Chaos
- 8 Synchronization of Chaos
- 9 Fractals
- 10 Cellular Automata
- 11 Solving Differential Equations
- 12 Optimization
- 13 Neural Networks
- 14 Genetic Algorithms
- 15 Gene Expression Programming
- 16 Wavelets
- 17 Discrete Hidden Markov Models
- 18 Fuzzy Sets and Fuzzy Logic

An Introduction to Integral Transforms and Their Applications

Olga Moreira

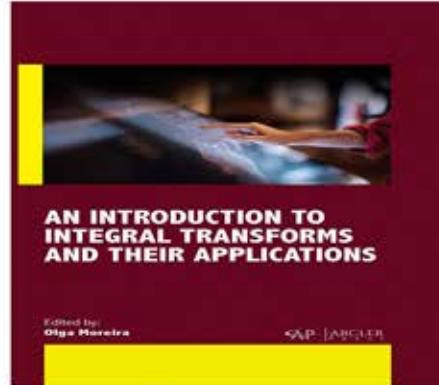

Table of contents

- Chapter 1 Global behavior of Integral Transforms
- Chapter 2 The Intrinsic Structure And Properties of Laplace-Typed Integral Transforms
- Chapter 3 On the Q-Laplace Transform and Related Special Functions
- Chapter 4 Fourier-Mellin Transforms For Circular Domains
- Chapter 5 Singular Integral Equations of Convolution Type With Hilbert Kernel and a Discrete Jump Problem
- Chapter 6 Matrix Fourier Transforms For Consistent Mathematical Models
- Chapter 7 Applications of The Fuzzy Sumudu Transform For The Solution of First Order Fuzzy Differential Equations
- Chapter 8 The Mehler-Fock Transform in Signal Processing
- Chapter 9 Local Fractional -Transforms With Applications To Signals on Cantor Sets
- Chapter 10 Fast Transforms in Image Processing: Compression, Restoration, and Resampling
- Chapter 11 Modeling of Thermal Distributions Around a Barrier at The Interface of Coating and Substrate
- Chapter 12 Dynamic Behavior of Axially Functionally Graded Pipes Conveying Fluid

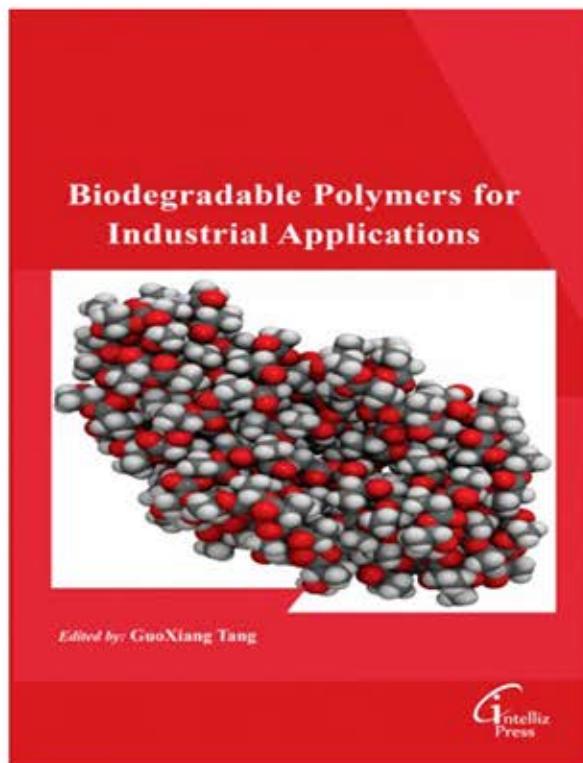

Table of contents

- Chapter 1 Polymers in the Pharmaceutical Applications-Natural and Bioactive Initiators and Catalysis in the Synthesis of Biodegradable and Bioresorbable Polyesters and Polycarbonates**
- Chapter 2 Biodegradable Polycarbonate longels for Electrophysiology Measurements**
- Chapter 3 Bioresorbable Polymeric Scaffold in Cardiovascular Applications**
- Chapter 4 Biodegradable Polyester Materials Containing Gallates**
- Chapter 5 In vivo Analysis of Covering Materials Composed of Biodegradable Polymers enriched with Flax Fibers**
- Chapter 6 Biodegradable Polymeric Microsphere-Based Drug Delivery for Inductive Browning of Fat**
- Chapter 7 Biodegradable Polymers: Opportunities and Challenges**
- Chapter 8 Keratin Waste: The Biodegradable Polymers**
- Chapter 9 Advances in Conducting , Biodegradable and Biocompatible Copolymers for Biomedical Applications**
- Chapter 10 The Application of (+)-Catechin and Polydatin as Functional Additives for Biodegradable Polyesters**

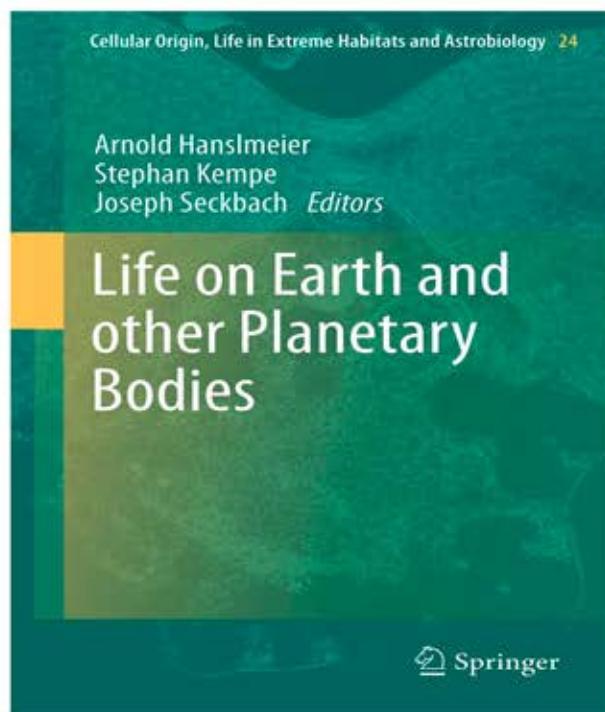

Table of contents

Pathways to Life on Earth and Other Planetary Bodies

Introduction

Halophiles, Continental Evaporites and the Search for Biosignatures in Environmental Analogues for Mars

Vesicular Basalts as a Niche for Microbial Life

SETI: Assessing Imaginative Proposals

Molecules Between the Stars

Prokaryotic Communities Below Planetary Surfaces and Their Involvement in the Nitrogen Cycle

Extrasolar Planets

"Life Without Water": The Sleeping Chironomid and Other Anhydrobiotic Invertebrates and Their Utilization in Astrobiology

Habitability and Cosmic Catastrophes

Glaciopanspermia: Seeding the Terrestrial Planets with Life?

Chemical Evolution in Primeval Seas

Terrestrial Analogues for Early Planetary Oceans: NIUAFO'OU CALDERA LAKES (Tonga) and Their Geology, Water Chemistry, and Stromatolites

Comparison of Environment Types with Liquid Water on Mars

Criteria of Possible Habitability of Earthlike Exoplanets

Origin of the Genetic Code and Abiotic Synthesis of Organic Compounds

Dynamical Aspects for the Earth's Habitability

A Dynamic Scheme to Assess Habitability of Exoplanets

Astrobiology of Titan

The Likelihood of Halophilic Life in the Universe

Production of Dormant Stages and Stress Resistance of Polar Cyanobacteria

Can the Evolution of Multicellularity Be Anticipated in the Exploration of the Solar System?

Antarctica as Model for the Possible Emergence of Life on Europa

The Likelihood of Extraterrestrial Intelligent Life

The Astrobiological Potential of Polar Dunes on Mars

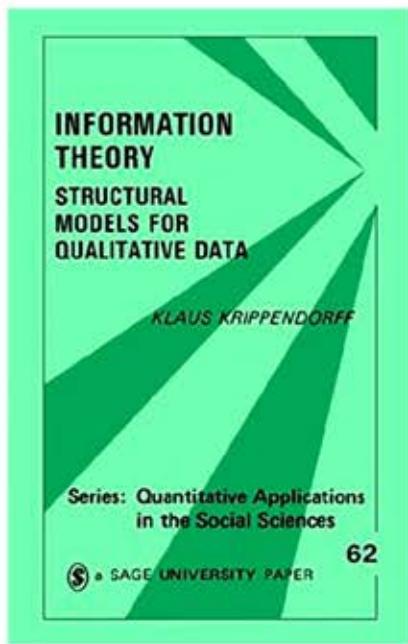

Life in Earth's Lava Caves: Implications for Life Detection on Other Planets

Life in the Saturnian Neighborhood

Organism Index

Information theory: structural models for qualitative data

Klaus Krippendorff

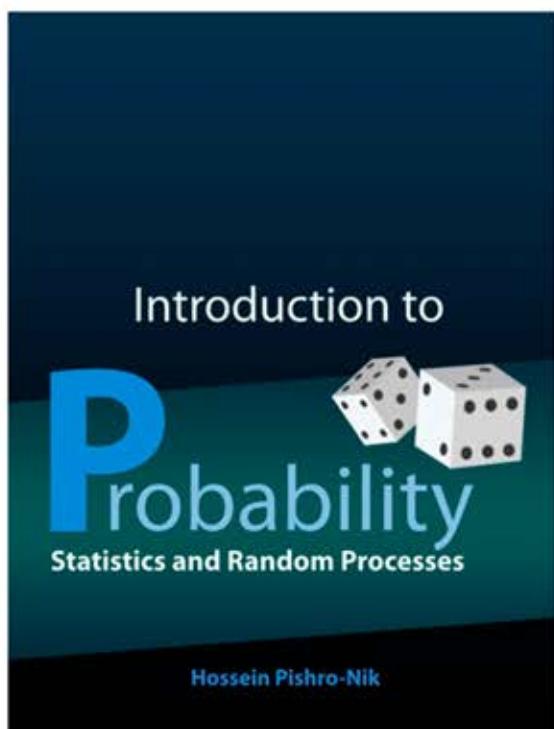

Contents

- 1 Qualitative Data
- 2 Selective Information
- 3 Entropy, Diversity, Variety
- 4 Shannon's Theory of Communication
- 5 Comparisons of Qualitative Variates
- 6 Structural Models
- 7 Models with and Without Loops
- 8 Information in Models and in Data
- 9 Structural Zeros
- 10 Degrees of Freedom
- 11 The Significance of Information Quantities
- 12 Maximum Entropy Computations
- 13 Confirmation
- 14 Exploration
- 15 Comparisons with Alternative Approaches
- 16 List of Symbols

Introduction to Probability Statistics, and Random Processes

Hossein Pishro-Nik

Contents

- 1 Basic Concepts
- 2 Combinatorics: Counting Methods
- 3 Discrete Random Variables
- 4 Continuous and Mixed Random Variables
- 5 Joint Distributions: Two Random Variables
- 6 Multiple Random Variables
- 7 Limited Theorems and Convergence of Random Variables
- 8 Statistical Inference I: Classical Methods
- 9 Statistical Inference II: Bayesian Interference
- 10 Introduction to Random Processes
- 11 Some Important Random Processes
- 12 Introduction to Simulation Using MATLAB (Available Online)
- 13 Introduction to Simulation Using R (Available Online)
- 14 recursive Methods (Available Online)

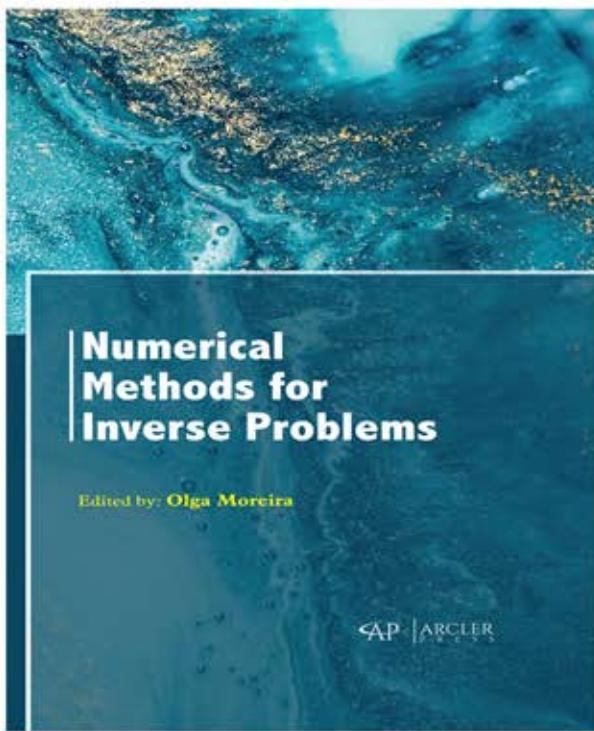

Table of contents

- Chapter 1 A Numerical Approximation Method for the Inverse Problem of the Three-Dimensional Laplace Equation**
- Chapter 2 The Numerical Solution of Forward and Inverse Robin Problems for Laplace's Equation**
- Chapter 3 Moving Least Squares Method for a One-dimensional Parabolic Inverse Problem**
- Chapter 4 The Inverse Problem of the Heat Equation with Periodic Boundary and Integral Overdetermination Conditions**
- Chapter 5 An Inverse Problem for a Two-Dimensional Time-Fractional Sedeways Heat Equation**
- Chapter 6 Numerical Inversion for the Multiple Fractional Orders in the Multiterm TFDE**
- Chapter 7 Solutions of Direct and Inverse Even-Order Sturm-Liouville Problems Using Magnus Expansion**
- Chapter 8 Numerical Solution of Direct and Inverse Problems for Time-Dependent Volterra Integro-Differential Equation Using Finite Integration Method with Shifted Chebyshev Polynomials**
- Chapter 9 Direct and Inverse Problem for Geometric Perturbation of the Laplace Operator in a Strip**
- Chapter 10 Solving Large-Scale Inverse Magnetostatic Problems Using the Adjoint Method**
- Chapter 11 The Problem of the Inverse Lyapunov Exponent and its Applications**
- Chapter 12 Nonlinear Damping Identification in Nonlinear Dynamic System Base don Stochastic Inverse Approach**
- Chapter 13 Model Order Reduction for Bayesian Approach to Inverse Problems**
- Chapter 14 Statistical Approaches to the Inverse Problem**

Statistical mechanics and entropy

Edited by Olga Moreira

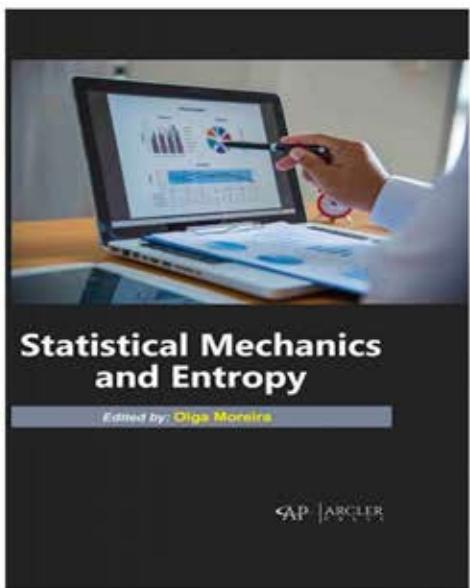

Table of contents

- Chapter 1 The Elusive Nature of Entropy and its Physical Meaning**
- Chapter 2 The Second Law and Entropy Misconceptions Demystified**
- Chapter 3 Thermodynamics, Statistical Mechanics and Entropy**
- Chapter 4 Entropy and its Correlations with Other Related Quantities**
- Chapter 5 A Brief Review of Generalized Entropies**
- Chapter 6 Beyond Boltzmann-Gibbs-Shannon in Physics and Elsewhere**
- Chapter 7 The Gibbs Paradox: Lessons from Thermodynamics**
- Chapter 8 The Gibbs Paradox and Particle Individuality**
- Chapter 9 Mixing Indistinguishable Systems Leads to a Quantum Gibbs Paradox**
- Chapter 10 Thermal Quantum Spacetime**
- Chapter 11 Thermodynamics, Stability and Hawking-Page Transition of Black Holes from Non-Extensive Statistical Mechanics in Quantum Geometry**
- Chapter 12 Gravitational Entropy and Inflation**
- Chapter 13 Statistical Mechanics and Thermodynamics of Viral Evolution**
- Chapter 14 Energy, Entropy and Exergy in Communication Networks**
- Chapter 15 Statistical Mechanics of Zooplankton**
- Chapter 16 Statistical Thermodynamics of Economic Systems**

Stability and Control of Nonlinear Systems

Edited by: D K Marzo

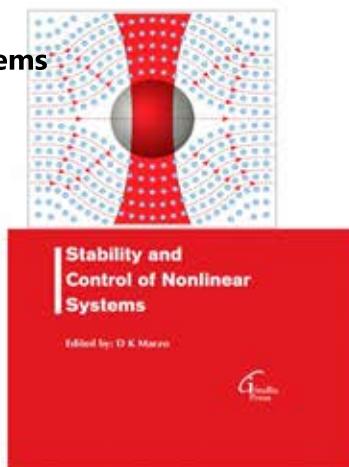

Table of Contents

- Chapter 1 The Dynamics of a Cubic Nonlinear System with No Equilibrium Point**

- Chapter 2 The 3D Nonlinear Dynamics of Catenary Slender Structures for Marine Applications**

- Chapter 3 LMI-Based Sliding Mode Observers for Incipient Faults Detection in Nonlinear System**

- Chapter 4 Nonlinear Systems Theory, Feminism, and Postprocessualism**

- Chapter 5 Nonlinear Dynamics and Probabilistic Behavior in Medicine: A case Study**

- Chapter 6 Decentralized Robust Adaptive Output Feedback Stabilization for Interconnected Nonlinear Systems with Uncertainties**

- Chapter 7 Chaos In A Non-Autonomous Nonlinear System describing Asymmetric Water Wheels**

- Chapter 8 A Conceptual model for the Nonlinear Dynamics of Edge-localized Modes in Tokamak Plasmas**

- Chapter 9 Reduction of Dimensions for Nonlinear Dynamical Systems**

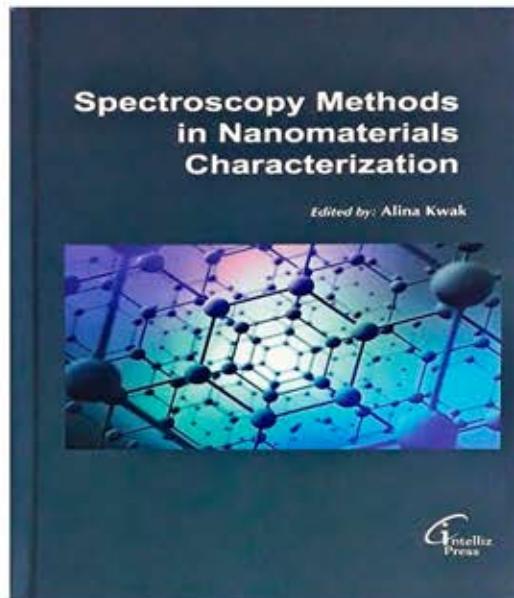

Table of contents

- Chapter 1 Synthesis and Characteization of Some Selenium Nanometric Compounds: Spectroscopic, Biological and Antioxidant Assessments**
- Chapter 2 Antioxidant Potential and Antibacterial Efficiency of Caffeic Acid-Functionalized ZnO Nanoparticles**
- Chapter 3 Spectroellipsometric Characterization and Modeling of Plasmonic Diamond-like Carbon Nanocomposite Films with Embedded Ag Nanoparticles**
- Chapter 4 Synthesis, Characterization, and Photocatalytic Properties of Sulfur- and Carbon-Codoped TiO₂ Nanoparticles**
- Chapter 5 Synthesis and Characterization of Poly (Azomethine Ester) S with a Pendent Dimethoxy Benzylidene Group**
- Chapter 6 Development of Flagella Bio-templated Nanomaterials for Electronics**
- Chapter 7 Characterization of Au and Bimetallic PtAu Nanoparticles on PDDA-Graphene Sheets as Electrocatalysts for Formic Acid Oxidation**
- Chapter 8 Metal Oxide Modified ZnO Nanomaterials for Biosensor Applications**
- Chapter 9 Mechanical and Electronic Properties of Graphene Nanostructures**
- Chapter 10 Functionalized Silicon Quantum Dots by N-vinylcarbazole: Synthesis and Spectroscopic properties**
- Chapter 11 Advancing the Understanding of Environmental Transformations, Bioavailability and Effects of Nanomaterials, and International US Environmental Protection Agency-UK Environmental Nanoscience Initiative Joint Program**
- Chapter 12 Chemical Oxidative Polymerization of 2-Aminothiazole in Aqueous Solution: Synthesis, Characterization and Kinetics Study**
- Chapter 13 Synthesis and Characterization of Perfluorooctanoic Acid Anionic Surfactant Doped Nanosize Polyaniline**
