

# Boletín de Adquisiciones Enero 2022

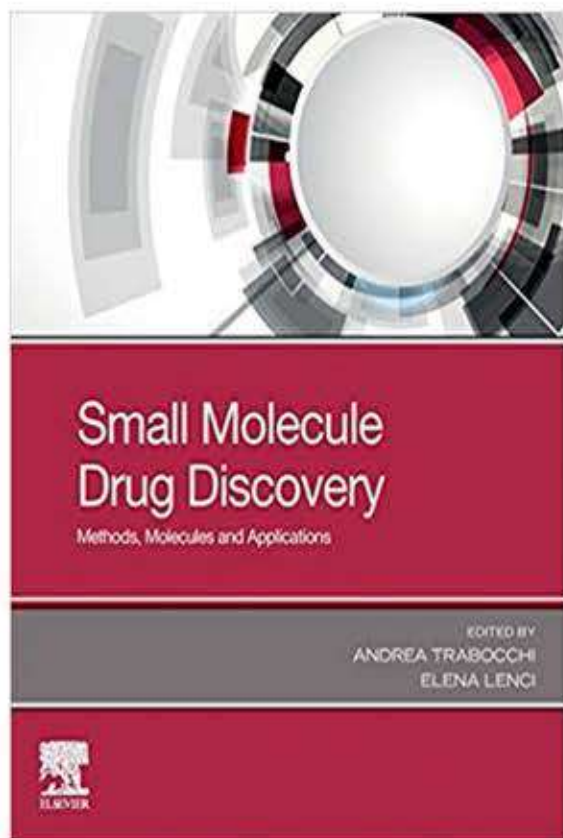

## Contents

1. Five-membered N-heterocycles.
2. Five-membered N-polyheterocycles.
3. Five-membered fused N-heterocycles.
4. Five-membered N, N-heterocycles.
5. Five-membered poly and fused O-heterocycles.
6. Five-membered O,N-heterocycles.
7. Six-membered N-heterocycles.
8. Six-membered N-polyheterocycles.
9. Six-membered fused N-heterocycles.
10. Six-membered N, N-heterocycles.
11. Seven-membered heterocycles.

## Table of contents

- Chapter 1 Digital Libraries: The Challenge of Integrating Instagram with a Taxonomy for Content Management
- Chapter 2 The Multimedia Library as a general Perspective of the Library System
- Chapter 3 Strategic Developments in Collection Storage of Libraries and Archives-Architectural, Technical, Political
- Chapter 4 Microfilm and Digitization as Choices in Preservation
- Chapter 5 The Challenges of Building Ex Libris Rosetta, a Digital Preservation System
- Chapter 6 Data Backup On: Cloud Computing Technology in Digital Libraries Perspective
- Chapter 7 The Open Library System- Re-Invented, Implemented and Working
- Chapter 8 Working for Audiovisual Preservation in Europe
- Chapter 9 The New Cross-Sectorial Agency in Norway for Archives, Libraries and Museums: Plans and Perspectives
- Chapter 10 The British Experience in Preserving Digital Library Collections
- Chapter 11 A Reliable Computational Workflow for the Selection of Optimal Screening Libraries
- Chapter 12 Unlocking the Digital Potential of Scholarly Monographs in 21St Century Research
- Chapter 13 Subject-Based Information Retrieval System in Digital Libraries
- Chapter 14 Performance Indicators for the Digital Library
- Chapter 15 Cloud-Supported Preservation of Digital Papers: A Solution for Special Collections?

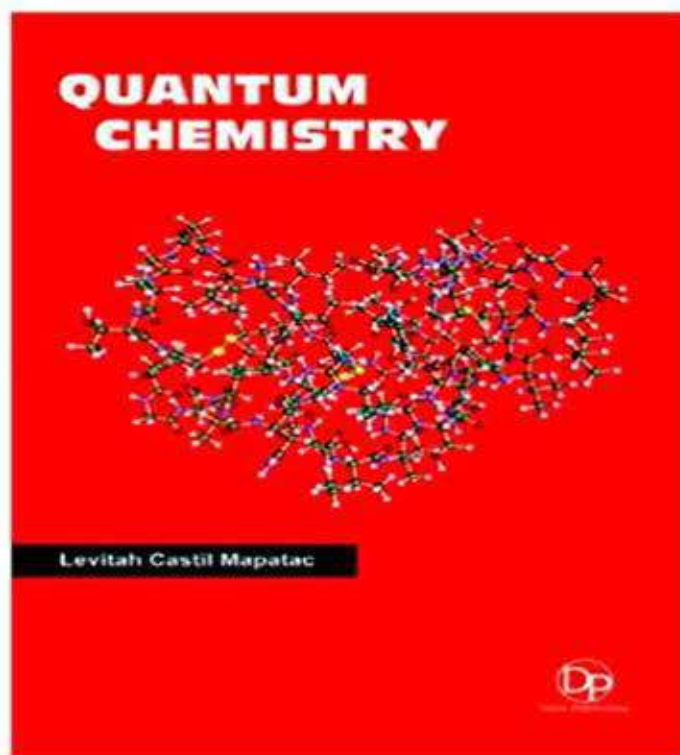

## Contents

- Chapter 1** Synthetic approaches toward small molecule libraries
- Chapter 2** Chemical reactions for building small molecules
- Chapter 3** Chemoinformatics approaches to assess chemical diversity and complexity of small molecules
- Chapter 4** Virtual screening of small-molecule libraries
- Chapter 5** Screening and biophysics in small molecule discovery
- Chapter 6** Principles and applications of small molecule peptidomimetics
- Chapter 7** sp<sup>2</sup>-Iminosugars as chemical mimics for glycodrug design
- Chapter 8** Synthesis and biological properties of spiroacetal-containing small molecules
- Chapter 9** Centrocountins—synthesis and chemical biology of nature inspired indoloquinolizines
- Chapter 10** PPIs as therapeutic targets for anticancer drug discovery: the case study of MDM2 and BET bromodomain inhibitors
- Chapter 11** Discovery of small molecules for the treatment of Alzheimer's disease

## Quantum Chemistry

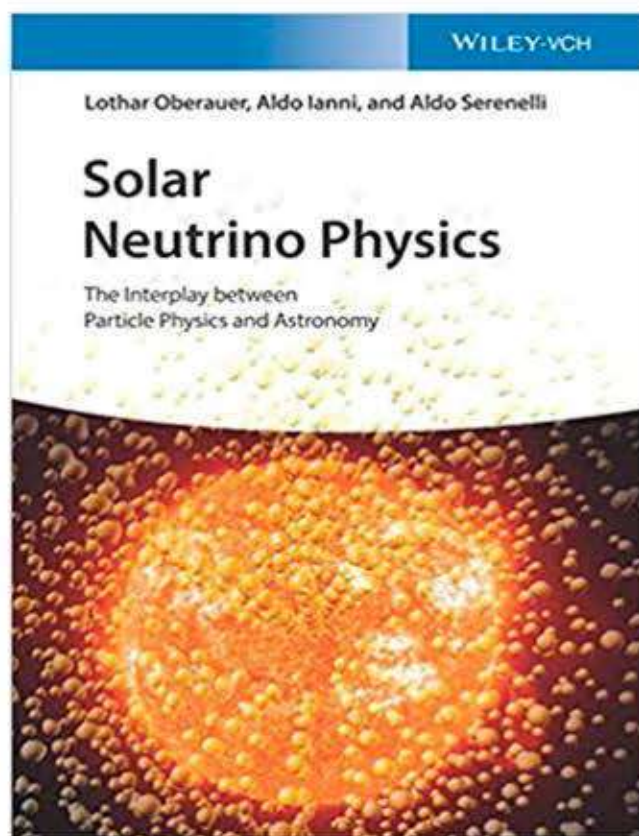

Levitah Castil Mapatac

## Table of Contents

- 1** Particle in a box
- 2** Wave-Particle duality
- 3** Valence bond theory
- 4** Atomic orbitals
- 5** Molecular orbital theory
- 6** Relativistic quantum chemistry
- 7** Schrödinger equation
- 8** Electronic band structure
- 9** Molecular Hamiltonian
- 10** Born-Huang approximation
- 11** Applications of rotational spectroscopy

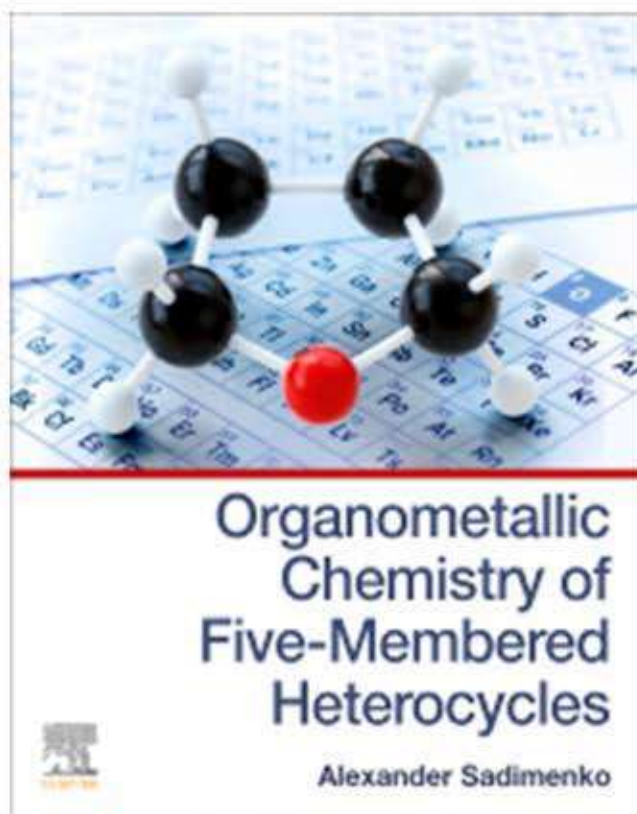

**Solar Neutrino Physics: The Interplay between Particle Physics and Astronomy**  
Lothar Oberauer, Aldo Ianni and Aldo Serenelli

**Contents**

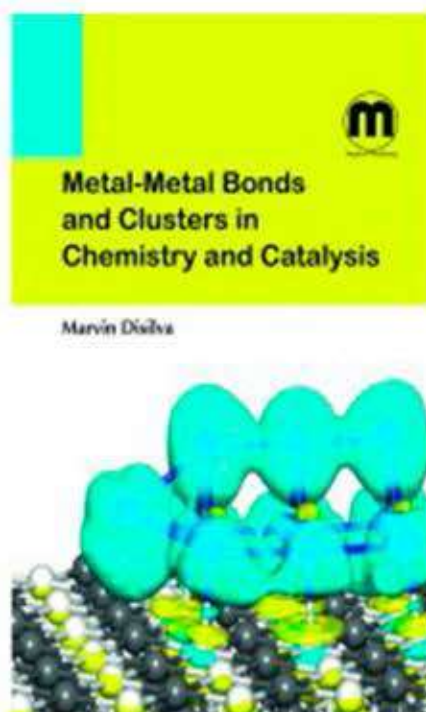

- 1 Introduction**
- 2 Solar Introduction and Evolution**
- 3. Neutrino Physics**
- 4. Solar Neutrino Experiments**
- 5. Future Solar Neutrino Experiments**

**Organometallic Chemistry of Five-Membered Heterocycles**  
Alexander Sadimenko

**Contents**

- 1 Furans and benzannulated forms**
- 2 Thiophenes, benzannulated forms, and analogs**
- 3 Pyrroles and benzannulated forms**
- 4 Phospholes, benzannulated forms, and analogs**
- 5 Siloles and analogs**
- 6 Boroles and analogs**

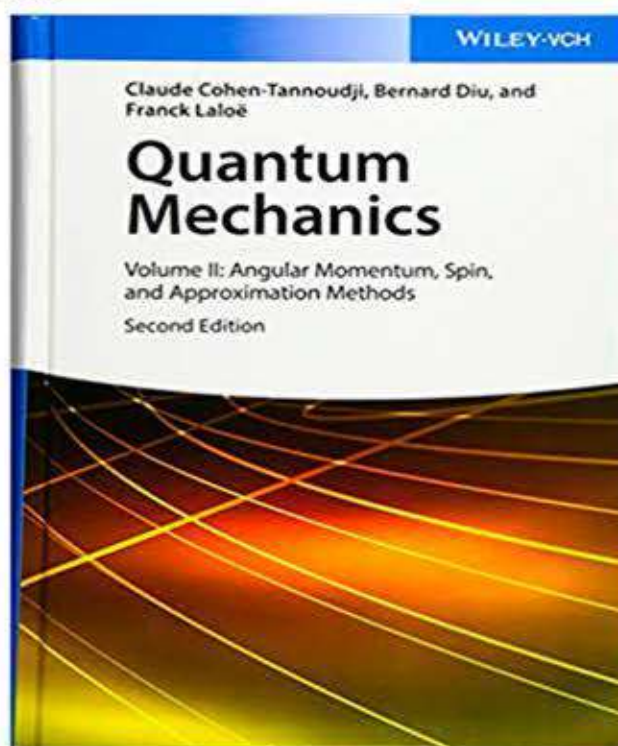

#### **Table of contents**

- Chapter 1** Interface Shear Actions and Mechanical properties of Nanostructured Dissimilar Al Alloy Laminated Metal Composites
- Chapter 2** Experimental Studies of Self Healing Behaviour of Under-Aged Al-Mg-Si Alloys and 60Sn-40Pb Alloy Reinforced Aluminium Metal-Metal Composites
- Chapter 3** Microstructure and mechanical Properties of Ultrasonic Welded Joint of 1060 Aluminum Alloy and T2 Pure Copper
- Chapter 4** Effect of Recasted Material Addition on the Quality of Metal-Ceramic Bond: A Macro-, and Nanostudy
- Chapter 5** Synthesis, Crystal Structure, and Chemical-Bonding Analysis of  $\text{BaZn}(\text{NcN})_2$
- Chapter 6** Review Article: Recent Advances in Metal-Ceramic Brazing
- Chapter 7** Mid-Term Review of ADEPT Metal-on-Metal Hip Prosthesis. Functional, Radiological and Metal Ion Analysis
- Chapter 8** Experimental Investigations on the Influence of Adhesive Oxides on the Metal-Ceramic Bond
- Chapter 9** In Situ-Generated Metal Oxide Catalyst During CO Oxidation Reaction Transformed from Redox-Active-Metal-Organic Framework-Supported Palladium Nanoparticles
- Chapter 10** Transition Metal Complexes of an Isatinic Quinolyl Hydrazone
- Chapter 11** Effect of Hydrogen Pair in an Iron-Nickel Alloy Embrittlement
- Chapter 12** Ti/Al Multi-Layered Sheets: Accumulative Roll Bonding (Part A)
- Chapter 13** Ti/Al Multi-Layered Sheets: Differential Speed Rolling (Part B)
- Chapter 14** The Decoration of Multi-Walled Carbon Nanotubes with Nickel Oxide Nanoparticles Using Chemical Method
- Chapter 15** Microstructure and Mechanical Properties of Accumulative Roll-Bonded AA1050A/AA5005 Laminated Metal Composites

**Quantum Mechanics**  
**Volume I: Basic Concepts, Tools, and Applications**  
2a ed.

**Quantum Mechanics**  
**Volume II: Angular Momentum, Spin, and Approximation Methods**  
2a ed.

**Claude Cohen-Tannoudji, Bernard Diu and Franck Laloe**

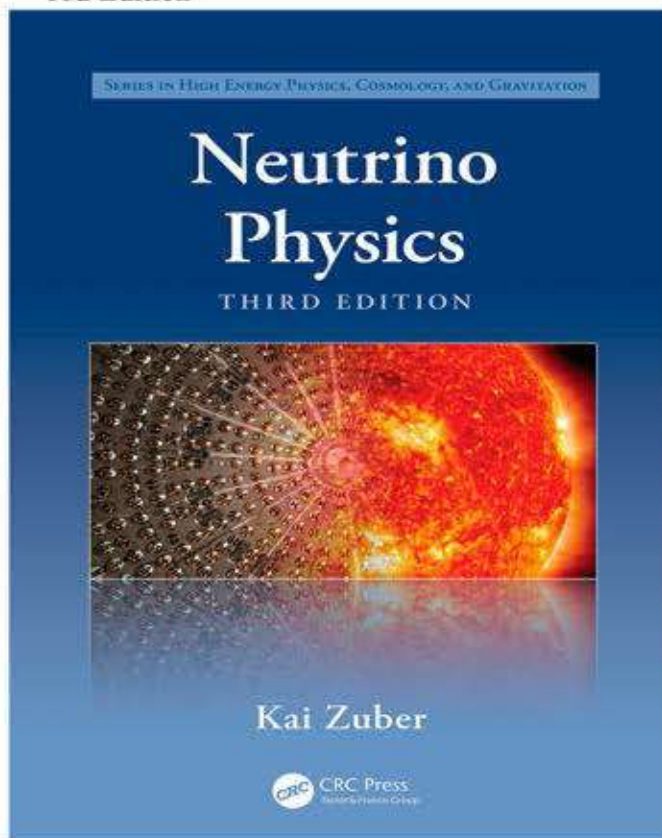

**Table of contents Vol.1**

- I WAVES AND PARTICLES: INTRODUCTION TO THE FUNDAMENTAL CONCEPTS OF QUANTUM MECHANICS**
- II THE MATHEMATICAL TOOLS OF QUANTUM MECHANICS**
- III THE POSTULATES OF QUANTUM MECHANICS**
- IV APPLICATION OF THE POSTULATES TO SIMPLE CASES: TWO LEVEL SYSTEMS AND SPIN 1/2 SYSTEMS**
- V THE ONE DIMENSIONAL HARMONIC OSCILLATOR**
- VI GENERAL PROPERTIES OF ANGULAR MOMENTUM IN QUANTUM MECHANICS**
- VII PARTICLES IN A CENTRAL POTENTIAL. THE HYDROGEN ATOM**

**Table of contents Vol. 2**

- VIII AN ELEMENTARY APPROACH TO THE QUANTUM THEORY OF SCATTERING BY A POTENTIAL**
- IX ELECTRON SPIN**
- X ADDITION OF ANGULAR MOMENTA**
- XI STATIONARY PERTURBATION THEORY**
- XII AN APPLICATION OF PERTURBATION THEORY: THE FINE AND HYPERFINE STRUCTURE OF THE HYDROGEN ATOM**
- XIII APPROXIMATION METHODS FOR TIME-DEPENDENT PROBLEMS**
- XIV SYSTEMS OF IDENTICAL PARTICLES**

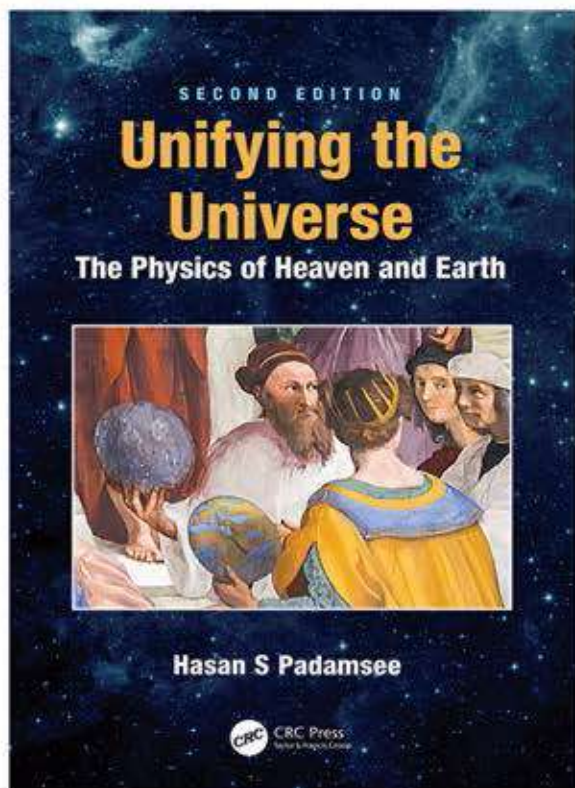

Neutrino Physics  
Kai Zuber  
3rd Edition

## Contents

1. Important historical experiments
2. Properties of neutrinos
3. The standard model of particle physics
4. Neutrinos as a probe of nuclear structure
5. Neutrino masses and physics beyond the standard model
6. Direct neutrino mass searches
7. Double Beta-decay
8. Neutrino oscillations
9. Atmospheric neutrinos
10. Solar neutrinos
11. Neutrinos from supernovae
12. Ultra-high energetic cosmic neutrinos
13. Neutrinos in cosmology
14. Summary and outlook

Unifying the Universe : The Physics of Heaven and Earth  
2a ed.  
Hasan S. Padamsee

## Contents

### Part 1: The Earth

- Chapter 1. The Shapes of Nature: Beginnings of Scientific Thought
- Chapter 2. Matter in Motion - An Elementary Quest: Beyond Reason and Observation
- Chapter 3. Science Lost, Science Regained: The Rise of Empiricism
- Chapter 4. Terrestrial Motion: Dynamic Symmetries

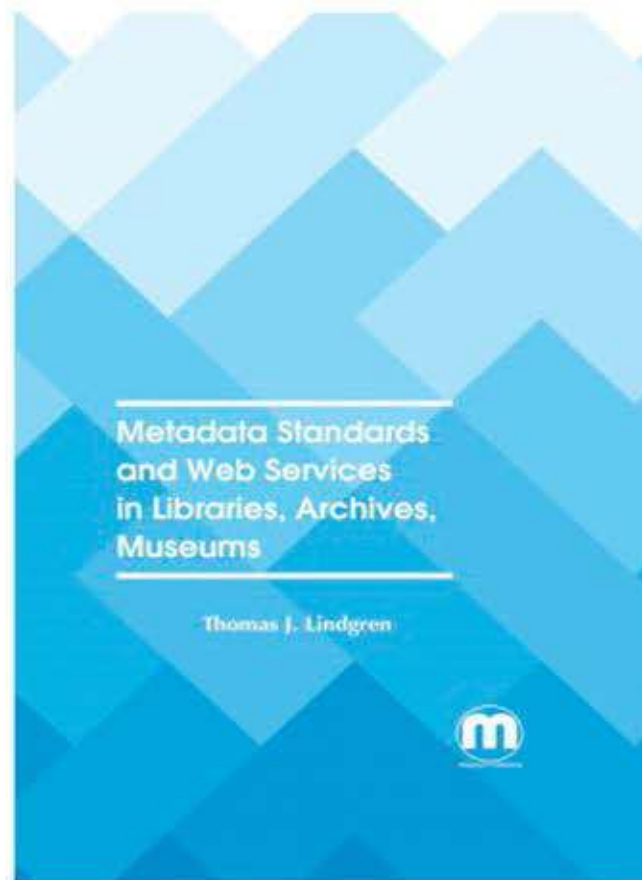

### Part 2: The Heavens

- Chapter 5. Celestial Motion: A Heavenly Romance with the Solar System
- Chapter 6. Spherical Models: Scaling the Cosmos
- Chapter 7. Reformation and Revolution: Changing Perspectives
- Chapter 8. Laws of Motion in the Heavens: Opening New Doors through Precision
- Chapter 9. A New Heaven: A Wide-Open Universe

### Part 3: Synthesis

- Chapter 10. Rise of the Mechanical Universe: Unifying Space and Time
- Chapter 11. Universal Gravitation: The First Synthesis
- Chapter 12. Quantum Wonderland
- Chapter 13. Unity in Physics

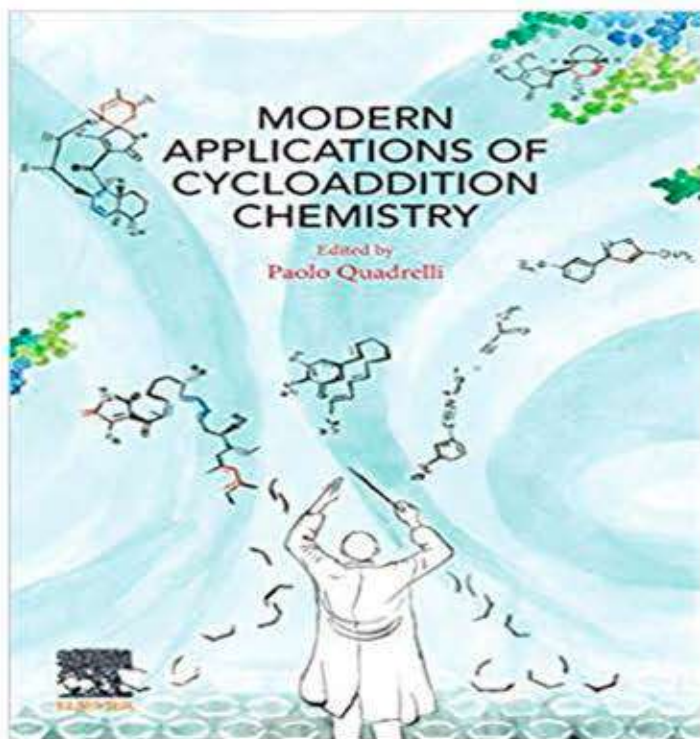

**Metadata Standards and Web Services in Libraries, Archives, Museums**  
Edited by Thomas J. Lindgren

**Table of contents**

- Chapter 1 A Semantic Metadata Enrichment Software Ecosystem (SMESE) Base don a Multi-Platform Metadata Model for Digital Libraries**
- Chapter 2 Big Data and Their Impacto n Libraries**
- Chapter 3 Fair principles for Library,Archive and Museum Collections: A Proposal for Standards for Reusable Collections**
- Chapter 4 Digital Library Education in Europe: A Survey**
- Chapter 5 An Investigation on Integrated Library Systems (IIS) in Use in University Libraries in Osun State,Nigeria**
- Chapter 6 Digital Libraries: The Challenge of Integrating Instagram with a Taxonomy for Content Management**
- Chapter 7 Perspectives of Lis Academic and Post Graduate on Standards-Based and Socially-Constructed Metadata**
- Chapter 8 Comparative Evaluation of Three Types of Semantic Distance Metrics-Implications for Use in Semantic Search**
- Chapter 9 Technology of Secure File Archiving in the Uniformly random Distributed Archive Scheme**
- Chapter 10 strategic Developments in Collection Storage of Libraries and Archives-Architectural, Technical, Political**
- Chapter 11 Reviewing the Domain of Technology and Innovation Management: A Visualizing Bibliometric Analysis**

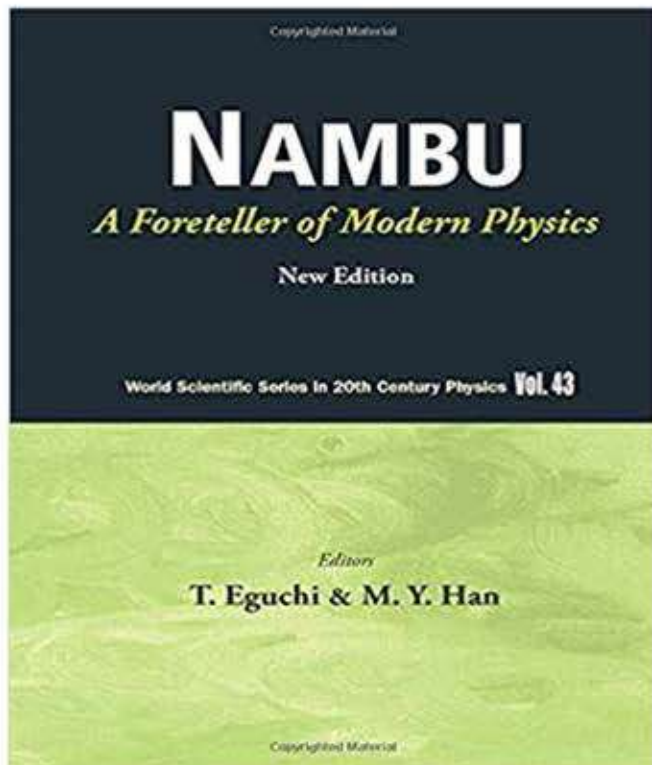

**Modern Applications of Cycloaddition Chemistry**  
Edited by Paolo Quadrelli

**Contents**

1. Cycloaddition Reactions for Antiviral Compounds
2. Cycloaddition Reactions for Anticancer Compounds
3. Drug Delivery and Cycloaddition Reactions
4. Natural Strategies in Cycloaddition Reactions
5. Cycloaddition Reactions in Material Science

**NAMBU : A foreteller of modern physics**  
T. Eguchi & M.Y.Han

**Contents**

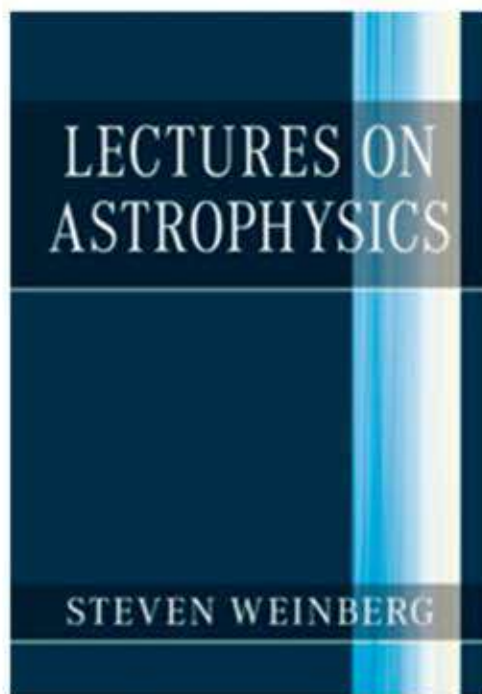

**Selected Papers**

1. Force Potentials in Quantum Field Theory
2. On the Nature of V-Particles I and II
3. Possible Existence of a Heavy Neutral Meson
4. Quasi-Particles and Gauge Invariance in the Theory of Superconductivity
5. Axial Vector Current Conservation in Weak Interactions
6. Dynamical Model of Elementary Particles Based on an Analogy with Superconductivity I
7. Dynamical Model of Elementary Particles Based on an Analogy with Superconductivity II
8. Chirality Conservation with Soft Pion Production
9. Three-Triplet Model with Double SU(3) Symmetry
10. A Systematics of Hadrons in Subnuclear Physics
11. S-Matrix in Semiclassical Approximation
12. Quark Model and the Factorization of the Veneziano Amplitude
13. Duality and Hadrodynamics
14. Generalized Hamiltonian Dynamics
15. Fermion-Boson Relations in BCS-Type Theories
16. Three Stages, Three Modes, and Beyond
17. Some Anomalies Related to Spontaneous Symmetry Breaking
18. 2008 Nobel Lecture

## Table of contents

- Chapter 1 The Need of Strategic Human Resource Management for the Development of Information Technology in Libraries
- Chapter 2 E-Inclusion and Public Libraries: A Literature Review
- Chapter 3 Technology Transfer and Libraries: Embedding the Library in the Technology Transfer Process
- Chapter 4 Research Methods in Library and Information Science
- Chapter 5 University Students' perceptions and Attitudes Towards the Use of Mobile Phones in Libraries: A Case of Makerere University Library (Maklib)
- Chapter 6 Leveraging Semantic Analysis Technologies to Increase Effectiveness and Efficiency of Access to Information
- Chapter 7 Measuring Customer Satisfaction-Over Time and in Global Benchmarks
- Chapter 8 Comparative Evaluation of Three Types of Semantic Distance Metrics-Implications for Use in Semantic Search
- Chapter 9 Assessment of Information Literacy Courses for PhD Students
- Chapter 10 Web Accessibility Standards in Libraries
- Chapter 11 Using Phenomenology to Improve Information Literacy Curricular Planning and Design
- Chapter 12 Listening to Our Students: Enhancing Library Instruction Through a Qualitative Assessment of Student Feedback
- Chapter 13 Quality and Value of Library Services from a User's Perspective: The case of The National and University Library in Ljubljana
- Chapter 14 Change Management in Transition to E-Learning System
- Chapter 15 Perspectives of LIS Academics and Post Graduates on Standards-Based and Socially-Constructed Metadata Approaches

## Contents

### 1 Stars

- 1.1 Hydrostatic Equilibrium
- 1.2 Radiative Energy Transport
- 1.3 Radiative Models
- 1.4 Opacity
- 1.5 Nuclear Energy generation
- 1.6 Relations among Observables: The Main Sequence
- 1.7 Convection
- 1.8 Polytropes
- 1.9 Instability
- 1.10 White Dwarfs and Neutron Stars
- 1.11 Supermassive Stars

### 2 Binaries

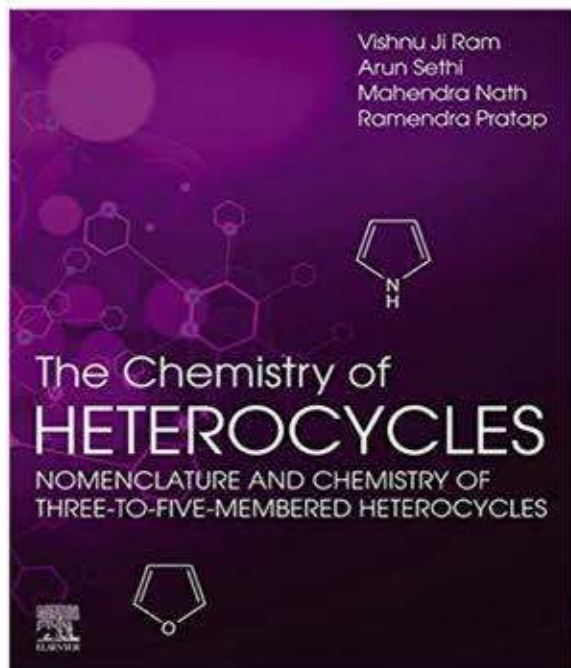

- 2.1 Orbits
- 2.2 Close Binaries
- 2.3 Gravitational Wave Emission: Binary Pulsars
- 2.4 Gravitational Wave Detection: Coalescing Binaries

### 3 The Interstellar Medium

- 3.1 Spectral Lines
- 3.2 HII Regions
- 3.3. Cooling
- 3.4 Star Formation
- 3.5 Accretion Disks
- 3.6 Accretion Spheres
- 3.7 Soft Bremsstrahlung

### 4 Galaxies

- 4.1 Collisionless Dynamics
- 4.2 Polytropes and Isothermals
- 4.3 Galactic Disks
- 4.4 Spiral Arms
- 4.5 Quasars

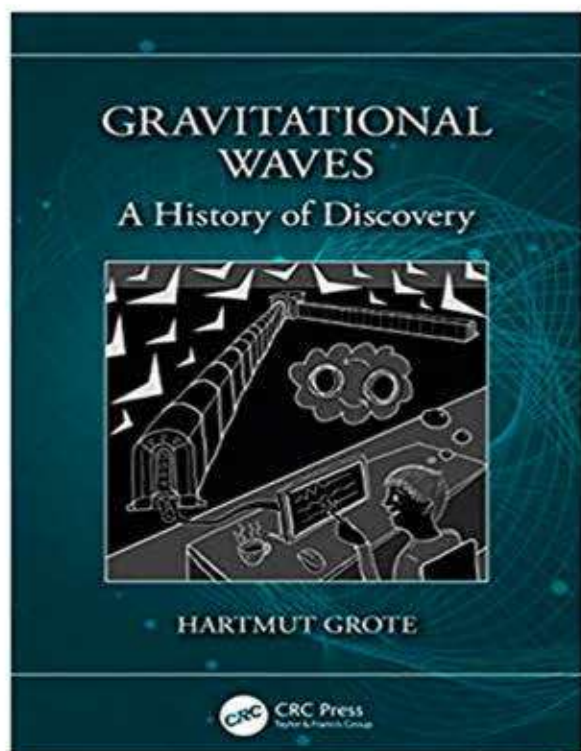

## Contents

1. Introduction
2. Nomenclature of Diverse Heterocycles
3. Three Membered Ring Heterocycles
4. Four Membered Heterocycles
5. Five Membered Heterocycles

## Gravitational Waves :A History of Discovery

Hartmut Grote

## Contents

- Chapter 1. They Exist, They Don't Exist, They Exist
- Chapter 2. They Exist, They Don't Exist
- Chapter 3. Michelson's Legacy: The Interferometer
- Chapter 4. Interferometers: Around the World
- Chapter 5. Data Analysis and Big Dog
- Chapter 6. They Exist!
- Chapter 7. Future Developments

Edited by Corey R. J. Stephenson, Tehshik P. Yoon,  
and David W. C. MacMillan

# Visible Light Photocatalysis in Organic Chemistry

## Contents

- 1 An Overview of the Physical and Photophysical Properties of  $[\text{Ru}(\text{bpy})_3]^{2+}$
- 2 Visible-Light-Mediated Free Radical Synthesis
- 3 Atom Transfer Radical Addition using Photoredox Catalysis
- 4 Visible Light Mediated  $\alpha$ -Amino C—H Functionalization Reactions
- 5 Visible Light Mediated Cycloaddition Reactions
- 6 Metal-Free Photo(redox) Catalysis
- 7 Visible Light and Copper Complexes: A Promising Match in Photoredox Catalysis
- 8 Arene Functionalization by Visible Light Photoredox Catalysis
- 9 Visible-Light Photocatalysis in the Synthesis of Natural Products
- 10 Dual Photoredox Catalysis: The Merger of Photoredox Catalysis with Other Catalytic Activation Modes
- 11 Enantioselective Photocatalysis
- 12 Photomediated Controlled Polymerizations
- 13 Accelerating Visible-Light Photoredox Catalysis in Continuous-Flow Reactors
- 14 The Application of Visible-Light-Mediated Reactions to the Synthesis of Pharmaceutical Compounds
