

Boletín de Adquisiciones Octubre 2022 Parte 1

Contents

- 1 Atoms and Molecules as Bound Quantum Systems
- 2 Quantum Scattering Theories
- 3 Electron Atom Scattering and Ionization
- 4 Electron Molecule Scattering and Ionization – I: Small Molecules and Radicals
- 5 Electron Molecule Scattering and Ionization – II: Other Polyatomic Molecules and Radicals
- 6 Applications of Electron Scattering

Biomedical Photoacoustics Edited By Sihua Yang, and Da Xing

Contents

- 1. Fundamentals of Photoacoustics
- 2. Fast Photoacoustic imaging technology
- 3. Photoacoustic Microscopy
- 4. Photoacoustic endoscopy and its biomedical applications
- 5. Photoacoustic Viscoelasticity Imaging Technique
- 6. All-Optical Photoacoustic Technology
- 7. Nanoprobes as Contrast Agents for Biomedical Photoacoustic Imaging

Classical Kinetic Theory of Weakly Turbulent Nonlinear Plasma Processes Peter H. Yoon

Contents

PART Vlasov Weak Turbulence Theory: Electrostatic Approximation

- **1** Nonlinear Electrostatic Equations for Collisionless Plasmas
- 2 Electrostatic Vlasov Weak Turbulence Theory: Wave Kinetic Equation
- **3** Electrostatic Vlasov Weak Turbulence Theory: Particle Kinetic Equation

Part II Klimontovich Weak Turbulence Theory: Electrostatic Approximation

- **4** Electrostatic Klimontovich Weak Turbulence Theory
- **5** Spontaneous Emission and Collisional Kinetic Equation
- 6 Langmuir Turbulence and Electron Kappa Distribution

Part III Vlasov Weak Turbulence Theory: Electromagnetic Formalism

- 7 Nonlinear Electromagnetic Equations in Vlasov Plasmas
- 8 Electromagnetic Vlasov Weak Turbulence Theory

Part IV Klimontovich Weak Turbulence Theory: Electromagnetic Formalism

- 9 Electromagnetic Klimontovich Weak Turbulence Theory
- **10** Applications of Electromagnetic Klimontovich Weak Turbulence Theory

Combinatorial Physics : combinatorics, quantum field theory, and quantum gravity models Adrian Tanasa

Contents

- 1. Introduction
- 2. Graphs, maps and polynomials
- 3. Quantum field theory (QFT)- built-in combinatorics
- 4. Tree weights and renormalization in QFT
- 5. Combinatorial QFT and the Jacobian Conjecture
- 6. Fermionic QFT, Grassmann calculus and combinatorics
- 7. Analytic combinatorics and QFT
- 8. Algebraic combinatorics and QFT
- 9. QFT on the non-commutative Moyal space and combinatorics
 - 10. Quantum gravity, Group Field Theory (GFT) and combinatorics
 - **11. From random matrices to random tensors**
 - 12. Random tensor models the U(N)D-invariant model
 - 13. Random tensor models the multi-orientable (MO) model
 - 14. Random tensor models the O(N)³ invariant model
 - 15. The Sachdev-Ye-Kitaev (SYK) holographic model
 - 16. SYK-like tensor models

Fundamentals of Spatial Analysis and Modelling Jay Gao

Contents

- **1** Introduction
- 2 Space in Spatial Analysis
- **3 Spatial Data and Association**
- **4 Descriptive and Inferential Spatial Analysis**
- **5** Geostatistics and Spatial Interpolation
- **6 Spatial Modelling**
- 7 Spatial Simulation
- 8 Time-explicit Spatial Analysis and Modelling

Modern Ophthalmic Optics José Alonso, José A. Gómez-Pedrero and Juan A. Quiroga

MODERN OPHTHALMIC OPTICS

Contents

- **1** Ophthalmic Materials
- 2 Surfaces in Ophthalmic Lenses
- 3 Wavefronts and Rays
- **4** Single Vision Lenses
- 5 The Lens-Eye System
- 6 Aberrations and Lens Design
- 7 Optics of Contact and Intraocular Lenses
- 8 Multifocal Lenses
- 9 Low Vision Aids and High Power Lenses
- 10 Lens Manufacturing and Measurement
- **11 Filters and Coatings**

José Alonso José A. Gómez-Pedrero Juan A. Quiroga

Nuclear Power and Sustainable Development Edited by: Mulmudi Hemant Kumar

Table of contents

Chapter 1 Introduction to Nuclear Power Chapter 2 The Environmental Dimension of Nuclear Power Chapter 3 Human Health snd Nuclear Power Chapter 4 Nuclear Power Challenges and Opportunities Chapter 5 Nuclear Power and Sustainable Development Chapter 6 Ethics of Nuclear Power Chapter 7 Emerging Fuel Technologies and Policies Related to Them Chapter 8 Waste Management and Recycling

Path Integral Approach in Theoretical Physics Edited by Harinirina Randrianarisoa

Path Integral Approach in Theoretical Physics

Edited by: Harinirina Randrianarisoa

AND DESCRIPTION

Table of contents

Chapter 1 Elliptic Feynman Integrals and Pure Functions

Chapter 2 Multi-Regge Kinematics and the Scattering Equations

Chapter 3 L-functions for Meromorphic Modular Forms and Sum Rules in Conformal Field Theory

- **Chapter 4 Path Integral for Multi-field Inflation**
- **Chapter 5 Anomalous Paths in Quantum Mechanical Path-Integrals**
- Chapter 6 Variational Path-integral Approach to Back-reactions of Composite Mesons in the Nambu-Lasinio Model
- Chapter 7 Dual Representation for the Generating Functional of the Feynman Path-Integral
- Chapter 8 A Boundary Integral Method for Modelling Vibroacoustic Energy Distributions in Uncertain Built up Structures

Quantum Gravity Editor: Adam Stamboulis

Table of contents

Chapter 1 Introduction: Quantum Gravity, Why, What? Chapter 2 Special Relativity and Electromagnetism Chapter 3 Elements of General Relativity Chapter 4 Hamiltonian Mechanics Chapter 5 Quantum mechanics Chapter 6 Yang-Mills Theories Chapter 7 Quantum Cosmology

- Chapter 1 Kinetic Theory beyond the Stosszahlansatz
- Chapter 2 On the Interrelations between Kinetics and Thermodynamics as the theories of Trajectories and States
- Chapter 3 Thermodynamic Analysis of a Half-Effect Absorption Cooling System Powered by a Low-Enthalpy Geothermal Source
- Chapter 4 Dispersion Effects in the Falkner-Skan Problem and the Kinetic Theory
- Chapter 5 New Patterns in Steady-State Chemical Kinetics: Intersections, Coincidences, Mapo f Events (Two-Step Mechanism)
- Chapter 6 Application of the Two-Fluid Model with Kinetic Theory of Granular Flow in Liquid-Solid Fluidized Beds
- Chapter 7 Gibbs Thermodynamics of the Renninger-Wilemski Problem
- Chapter 8 Kinetics and Thermodynamics of Living Copolymerization Processes
- Chapter 9 Thermodynamic Analysis about Nucleation and Growth of Cubic Boron Nitride Crystals in the hBN-Li3N System under High Pressure and High Temperature
- **Chapter 10 Theoretical Study of C₂H₅+NCO Reaction: Mechanism and Kinetics**
- Chapter 11 The Einstein-Vlasov System/Kinetic Theory

Quantum Optics Applications Nelson Bolivar

Table of contents

Chapter 1 Fundamentals of Quantum Optics Chapter 2 From Quantum Optics to Quantum Technologies Chapter 3 Integration of Quantum Optics and Photonics Chapter 4 Laser Spectroscopy and Quanum Optics Chapter 5 Quantum-Mechanical Concepts in Optical Coherence Chapter 6 Mode Converter Linear Optical Devices Chapter 7 Fundamentals of Nonlinear Quantum Optic

Proceedings of the International School of Physics "Enrico Fermi." Course 198 Quantum Simulators Edited by T. Calarco, R. Fazio and P. Mataloni

Contents

T. CALARCO, R. FAZIO and P. MATALONI – Preface Course group shot

Matteo Archimi – Percolation: From coffee to epidemic spreading

- P. KI. BARKOUTSOS- Reduction of k-local terms for fermionic systems: Perturbative versus numerical approaches
- A. CAPPELLARO- The complicated sentimental life of a boson: Interacting or not interacting?
- C.A. CARTWRIGHT The Bose-Hubbard modelo n a flat-band lattice. A community of bosons
- J. CATANI Quantum simulation with two-electron atoms
- A.J. DALEY Theoretical aspects of analogue quantum simulation with cold atoms
- F. FLAMINI and F. SCIARRINO Implementation and validation of photonic Boson Sampling
- **HELENA MAJURY The drunk mans walk**
- AHMED OMRAN- Watching ridiculously cold atoms in action
- M. PATERNOSTRO Quantum simulation with continuous-variable systems
- LORENZO M. PROCOPIO and PHILIP WALTHER Quantum simulations using photons
- N. VIGGIANIELLO How to reach the quantum supremacy (take the easier road!)
- G. ZARANTONELLO Microwaves are awesome
- JONAS ZEUNER -Complex multiphoton processing using integrated circuits
- **PENG ZHOU -Long live the qubit**

Principles and Practice of Modern Chromatographic Methods 2nd Edition Kevin Robards and Danielle Ryan

Contents

- 1 Introduction and overview
- 2 Theoretical considerations
- 3 Planar chromatography
- 4 Gas chromatography

5 High performance liquid chromatography: Instrumentation and techniques

- 6 High performance liquid chromatography: Separations
- 7 Supercritical fluid chromatography
- 8 Coupled systems
- 9 Analyses
- 10 Sample handling in chromatography
- 11 Preparative chromatography

The Grand Biocentric Design : how life creates reality Robert Lanza, M.D., Matej Pavsic and Bob Berman

ROBERT LANZA, MD and MATEJ PAVŠIČ with Bob Berman

Contents

Introduction

- **1** Figuring Out the Universe
- 2 Newton's Apple Computer and Alternate Realities
- **3** Quantum Theory Changes Everything
- **4** Intimations of Immortality
- 5 Down with Realism
- 6 Consciousness
- 7 How Consciousness Works
- 8 Libet's Experiment Revisited
- 9 Animal Consciousness
- 10 Quantum Suicide and the Impossibility of Being Dead
- **11 The Arrow of Time**
- 12 Traveling in a Timeless Universe
- **13 The Forces of Nature**
- **14 The Observer Defines Reality**
- **15 Dreams and Multidimensional Reality**
- **16 Overthrow of the Physiocentric Worldview**
- Post Scriptum: The Man Who Cared

- Chapter 1 Measurement of the In-Plane Thermal Conductivity of Long Fiber Composites by Inverse Analysis
- Chapter 2 Investigation of Thermal Conductivity and Rheological Properties of Nanofluids Containing Graphene Nanoplatelets
- Chapter 3 Thermal Conductivity of Carbon Nanoreinforced Epoxy Composites
- Chapter 4 Anisotropic Thermal Diffusivity Measurements in High-Thermal-Conductive Carbon-Fiber-Reinforced Plastic Composites
- Chapter 5 Star CCM+CFD Simulations of Enhanced Heat Transfer in High-Power Density Electronics Using Forced Air Heat Exchanger and Pumped Fluid Loop Cold Plate Fabricated from High Thermal Conductivity Materials
- Chapter 6 Silica Aerogel as Super Thermal and Acoustic Insulation Materials
- Chapter 7 An Experimental Study on Thermal Conductivity and Viscosity of Nanofluids Containing Carbon Nanotubes
- Chapter 8 Through-Thickness Thermal Conductivity Prediction Study on Nanocomposites and Multiscale Composites
- Chapter 9 Effects of Various Types of Graphite on the Thermal Conductivity and Energy Storage Properties of Ternary Eutectic Fatty Acid-Based Composite as Phase Change Material
- Chapter 10 Anisotropic Structure of Glass Wool Determined by Air Permeability and Thermal Conductivity Measurements
- Chapter 11 Large-Surface-Area Bn Nanosheets and their Utilization in Polymeric Composites with Improved Thermal and Dielectric Properties
- Chapter 12 Thermal Conductive Composites Prepared by Addition of Several Ceramic Fillers to Thermally Cationic Curing Cycloaliphatic Epoxy Resins

- Chapter 1 Calculations of Heat Transfer in Torch Furnaces by Gas Volume Radiation Laws
- Chapter 2 Non-Equilibrium Thermodynamic Analysis of Double Diffusive, Nanofluid Forced Convection in Catalytic Microreactors with Radiation Effects
- Chapter 3 Numerical Study on Heat Transfer to an Arc Absorber Designed for a Waste heat Recovery System Around A Cement Kiln
- Chapter 4 The Effect of Geometrical Parameters on Heat Transfer Characteristics of Compact Heat Exchanger with Louvered Fins
- Chapter 5 Flow and Heat Transfer of Dusty Hyperbolic Tangent Fluid Over a Stretching Sheet in the Presence of Thermal Radiation and Magnetic Field
- Chapter 6 Designing Coaxial Ground Heat Exchangers with a Thermally Enhanced Outer Pipe
- Chapter 7 Comparison of Aldehyde Emissions Simulation with Ftir Measurements in the Exhaust of a Spark Ignition Engine Fueled by Ethanol
- Chapter 8 3-D Numerical Simulation of Heat Transfer in Biomedical Applications
- Chapter 9 Numerical Study of Fluid Dynamic and Heat Transfer in a Compact Heat Exchanger Using Nanofluids
- Chapter 10 The Influence of Surface Radiation on the Passive Cooling of a Heat-Generating Element

- **Chapter 1** Digital Processing Techniques for Fringe Analysis
- Chapter 2 FSD-HSO Optimization Algorithm for Closed Fringes Interferogram Demodulation
- Chapter 3 Reconstruction of Local Frequencies for Recovering the Unwrapped Phase in Optical Interferometry
- Chapter 4 Optical Aperture Synthesis with Electronically Connected Telescopes
- Chapter 5 Nanoscale Optical Interferometry with Incoherent Light
- Chapter 6 Quantum Enhancement of Accuracy and Precision in Optical Interferometry
- Chapter 7 Thermomechanical Behaviour of a PWB by Speckle Interferometry Technique
- Chapter 8 Phase-sensitive Interferometry of Decorrelated Speckle Patterns
- **Chapter 9** The Applications of the Heterodyne Interferoemetry
- Chapter 10 Synthetic Wavelength Interferometry o fan Optical Frequency Comb for Absolute Distance Measurement
- Chapter 11 Analysis of the Noise reduction Characteristics of a Diffuser with Fizeau Interferometry
- Chapter 12 Micro Fabry-Pérot Interferometer at Rayle Range
- Chapter 13 An atomic Fabry-Perot Interferometer Using a Pulsed Interacting Bose-Einstein Condensate
- **Chapter 14 Two-Photon interference of temporally separated photons**
- Chapter 15 Squeezed-light-Driven Force Detection with an Optomechanical Cavity in a Mach-Zehnder Interferometer
- **Chapter 16 Point Diffraction Interferometry**
- **Chapter 17 Radial Shearing Interferometer**
- **Chapter 18 Fiber-Optic Ring Resonator Interferometer**
- Chapter 19 Neural Network-Based Laser Interferometer Compensation for Seismic Signal Detection

- Chapter 1 Analysis of Combined Radiation and Forced Convection Heat Transfer in 3D Laminar Flow Overan Inclined Forward Facing Step
- Chapter 2 Numerical Analysis of Downhole Heat Exchanger Designed for Geothermal Energy Production
- Chapter 3 Experimental Convecton Heat Transfer Analysis of a Nano-Enhanced Industrial Coolant
- Chapter 4 Slip-Flow and Heat Transfer in a Porous Microchannel Saturated with Power-Law Fluid
- Chapter 5 Assessing the Role of Particles in Radiative Heat Transfer During Oxy-Combustion of Coal and Biomass Blends
- Chapter 6 Simulation of Natural Convection Heat Transfer Enhancement by Nanoparticles in an Open-Enclosure Using Lattice Boltzmann Method
- Chapter 7 A Numerical Study on Natural Convection Heat Transfer of Handheld Projectors with a Fin Array
- Chapter 8 Effects of Viscous Dissipation on Usteady Mixed Convection Heat Transfer from a Circular Cylinder for Parallel and Contra Flows
- Chapter 9 Numerical Modeling of non-Similar Mixed Convection Heat Transfer Over a Stretching Surface with Slip Conditions
- Chapter 10 Experimental and Numerical Investigation of Convective Heat Transfer of Supercritical Carbon Dioxide at Low Mass Fluxes
